Reasons Faiths

Reasons Faiths:

Reasons for Faith (Foreword by Lee Strobel) Norman L. Geisler, Chad V. Meister, 2007-10-26 Many Christians want to witness for their faith but they are afraid they will not be able to answer questions that others may ask of them First Peter 3 15 reminds believers to always be prepared to make a defense to anyone who asks you for a reason for the hope that is in you Norman Geisler and Chad Meister realize the fear of facing questions about the Christian faith Their book Reasons for Faith gives believers grounded biblical apologetics to help them defend their faith By covering the importance of apologetics and then applying apologetics to popular culture and theological issues these authors give all Christians the tools they need to stand firm in their faith and to be able to share that faith in today s society **Reason and Faith** Michael Bergmann, Jeffrey E. Brower, 2016 This volume presents ten new essays in philosophy of religion that develop and critically engage themes from the work of Richard Swinburne one of the most influential thinkers in the discipline over the last fifty years Written by a team of experts the essays focus on key debates in both natural theology and philosophical theology **A Reason for Faith** Laura Hales, 2016-04-15 The topics covered in this book are the talking points of the moment The information gleaned from reading the perspectives of these believing scholars will help start the process of discovering answers and coming to terms with the realities of the Church s past and provide tools for lifelong learning and study This book was written to provide reasons for faith by offering faithful answers to sincere questions **Why Religion Matters** Huston Smith, 2001-12-24 Huston Smith the author of the classic bestseller The World s Religions delivers a passionate timely message The human spirit is being suffocated by the dominant materialistic worldview of our times Smith champions a society in which religion is once again treasured and authentically practiced as the vital source of human wisdom **Reasons and Faiths** Ninian Smart, 2010 First published in 2000 Routledge is an imprint of Taylor Francis an informa company **Belief** Francis S. Collins, 2010-03-02 A brilliant wide ranging and powerful series of readings on the possibilities problems and mysteries of faith This book belongs on the shelf of every believer and every serious skeptic Rabbi David Wolpe author of Why Faith Matters This life giving faith filled and hard nosed collection reveals why as St Anselm wrote true faith always seeks to understand Rev James Martin author of My Life with the Saints From Dr Francis Collins New York Times bestselling author of The Language of God comes the definitive reader on the rationality of faith **Faith, Reason and the Existence of God** Denys Turner, 2004-09-16 The proposition that the existence of God is demonstrable by rational argument is doubted by nearly all philosophical opinion today and is thought by most Christian theologians to be incompatible with Christian faith This book argues that on the contrary there are reasons of faith why in principle the existence of God should be thought rationally demonstrable and that it is worthwhile revisiting the theology of Thomas Aquinas to see why this is so The book further suggests that philosophical objections to proofs of God s existence rely upon an attenuated and impoverished conception of reason which theologians of all monotheistic traditions might wish to reject Denys Turner proposes that on a broader and deeper conception of it human

rationality is open to the sacramental shape of creation as such and in its exercise of rational proof of God it in some way participates in that sacramentality of all things *Reason, Faith, & Revolution* Terry Eagleton, 2009 Demolishes the superstitious view of God held by most atheists and agnostics and offers in its place a revolutionary account of the Christian Gospel while launching an assault on the betrayal of this revolution by institutional Christianity Reason, Faith, and the Struggle for Western Civilization Samuel Gregg, 2019-06-25 Gregg's book is the closest thing I've encountered in a long time to a one volume user's manual for operating Western Civilization The Stream Reason Faith and the Struggle for Western Civilization offers a concise intellectual history of the West through the prism of the relationship between faith and reason Free Beacon The genius of Western civilization is its unique synthesis of reason and faith But today that synthesis is under attack from the East by radical Islam faith without reason and from within the West itself by aggressive secularism reason without faith The stakes are incalculably high The naive and increasingly common assumption that reason and faith are incompatible is simply at odds with the facts of history The revelation in the Hebrew Scriptures of a reasonable Creator imbued Judaism and Christianity with a conviction that the world is intelligible leading to the flowering of reason and the invention of science in the West It was no accident that the Enlightenment took place in the culture formed by the Jewish and Christian faiths We can all see that faith without reason is benighted at best fanatical and violent at worst But too many forget that reason stripped of faith is subject to its own pathologies A supposedly autonomous reason easily sinks into fanaticism stifling dissent as bigoted and irrational and devouring the humane civilization fostered by the integration of reason and faith The blood soaked history of the twentieth century attests to the totalitarian forces unleashed by corrupted reason But Samuel Gregg does more than lament the intellectual and spiritual ruin caused by the divorce of reason and faith He shows that each of these foundational principles corrects the other's excesses and enhances our comprehension of the truth in a continuous renewal of civilization By recovering this balance we can avoid a suicidal winner take all conflict between reason and faith and a future that will respect neither **Faith and Reason** Brian Besong, Jonathan Fuqua, 2019-05-20 Too smart to believe in God The twelve philosophers in this book are too smart not to and their finely honed reasoning skills and advanced educations are on display as they explain their reasons for believing in Christianity and entering the Roman Catholic Church Among the twelve converts are well known professors and writers including Peter Kreeft Edward Feser J Budziszewski Candace Vogler and Robert Koons Each story is unique yet each one details the various perceptible ways God drew these lovers of wisdom to himself and to the Church In every case reason played a primary role It had to because being a Catholic philosopher is no easy task when the majority of one's colleagues thinks that religious faith is irrational Although the reasonableness of the Catholic faith captured the attention of these philosophers and cleared a space into which the seed of supernatural faith could be planted in each of these essays the attentive reader will find a fully human story The contributions are not merely collections of arguments they are stories of grace **Faith Has Its Reasons**

Kenneth Boa, Robert M. Bowman Jr., 2006-03-01 Ever since the apostle Paul addressed the Stoic and Epicurean philosophers in Athens relating the Christian worldview to a non Christian world has been a challenge And despite Peter s charge to be ready to make a defense to everyone who asks you to give an account for the hope that is in you 1 Peter 3 15 most Christian laypeople have left apologetics the defense of the faith to the ecclesiastical pros Faith Has Its Reasons is a study of four different models of how apologetics should be done an assessment of their strengths and weaknesses and a proposal for integrating the best insights of each Kenneth Boa and Robert Bowman have assembled a wealth of information about what Christians believe and how to present that faith to an unbelieving world Remarkable both in its depth of content and ease of accessibility Faith Has Its Reasons gives Christian laypeople the tools to address such critical questions as Why is belief in God rational despite the prevalence of evil in the world What facts support the church s testimony that Jesus rose from the dead Can we be certain Christianity is true How can our faith in Christ be based on something more secure than our own understanding without descending into an irrational emotionalism

Why Religion? Elaine Pagels, 2018-11-06 Why is religion still around in the twenty first century Why do so many still believe And how do various traditions still shape the way people experience everything from sexuality to politics whether they are religious or not In Why Religion Elaine Pagels looks to her own life to help address these questions These questions took on a new urgency for Pagels when dealing with unimaginable loss the death of her young son followed a year later by the shocking loss of her husband Here she interweaves a personal story with the work that she loves illuminating how for better and worse religious traditions have shaped how we understand ourselves how we relate to one another and most importantly how to get through the most difficult challenges we face Drawing upon the perspectives of neurologists anthropologists and historians as well as her own research Pagels opens unexpected ways of understanding persistent religious aspects of our culture A provocative and deeply moving account from one of the most compelling religious thinkers at work today Why Religion explores the spiritual dimension of human experience

Faith Within Reason Herbert McCabe, 2007-03-10 Is it possible to think about religious beliefs philosophically Can theologians learn from philosophers Can philosophers learn from theologians Is it possible to be both a good Christian and a good thinker This book examines the nature of religious belief especially belief in God with an eye on both theological and philosophical arguments

Faith and Reason Richard Swinburne, 2005-09-29 Richard Swinburne presents a new edition of the final volume of his acclaimed trilogy on philosophical theology Faith and Reason is a self standing examination of the implications for religious faith of Swinburne s famous arguments about the coherence of theism and the existence of God By practising a particular religion a person seeks to achieve some or all of three goals that he worships and obeys God gains salvation for himself and helps others to attain their salvation But not all religions commend worship and different religions have different conceptions of salvation Faced with these differences Richard Swinburne argues that we should practice that religion which has the best goals and is more probably true than the creeds of other religions He proposes

criteria by which to determine the probabilities of different religious creeds and he argues that while requiring total commitment faith does not demand fully convinced belief While maintaining the same structure and conclusions as the original classic this second edition has been substantially rewritten both in order to relate its ideas more closely to those of classical theologians and philosophers and to respond to more recent views In particular he discusses and ultimately rejects the view of Alvin Plantinga that the warrant of a belief depends on the process which produced it and John Hick's contention that all religions offer valid paths to salvation

Faith Has Its Reasons Julie Kemp, 2017-09-25 Faith Has Its Reasons is the True Life Story of Julie Kemp and her son Landon and their life changing challenge that caused Landon to die three times and live to tell the story It is the story of overcoming grief and heartache thru Faith in God even when you feel forsaken by God

Believers: Faith in Human Nature Melvin Konner, 2019-09-10 An anthropologist examines the nature of religiosity and how it shapes and benefits humankind Believers is a scientist's answer to attacks on faith by some well meaning scientists and philosophers It is a firm rebuke of the Four Horsemen Richard Dawkins Daniel Dennett Sam Harris and Christopher Hitchens known for writing about religion as something irrational and ultimately harmful Anthropologist Melvin Konner who was raised as an Orthodox Jew but has lived his adult life without such faith explores the psychology development brain science evolution and even genetics of the varied religious impulses we experience as a species Conceding that faith is not for everyone he views religious people with a sympathetic eye his own upbringing his apprenticeship in the trance dance religion of the African Bushmen and his friends and explorations in Christian Buddhist Hindu Muslim and other faiths have all shaped his perspective Faith has always manifested itself in different ways some revelatory and comforting some kind and good some ecumenical and cosmopolitan some bigoted coercive and violent But the future Konner argues will both produce more nonbelievers and incline the religious among us holding their own by having larger families to increasingly reject prejudice and aggression A colorful weave of personal stories of religious and irreligious encounters as well as new scientific research Believers shows us that religion does much good as well as undoubted harm and that for at least a large minority of humanity the belief in things unseen neither can nor should go away

Faith and Reason Steve Wilkens, 2014-06-10 Steve Wilkens edits a debate between three different understandings of the relationship between faith and reason between theology and philosophy The three views include Faith and Philosophy in Tension Faith Seeking Understanding and the Thomistic Synthesis This introduction to a timeless quandary is an essential resource for students

Faith with Reason Paul Helm, 2000 Paul Helm presents a new study of the nature of religious faith investigating what makes it reasonable Religious belief needs to meet and sustain philosophical scrutiny just as any other type of belief does nothing about religion purchases immunity from this But at the same time religious epistemology must also respect the contours of religion the distinctiveness of the subject matter of religious belief Helm looks sympathetically at two currently prominent ways of defending the rationality of religious belief Reformed epistemology and the cumulative case

for theism He argues that the reasonableness of faith depends not only on beliefs about the world but also on beliefs about oneself for instance about what one wants about one's hopes and fears and on what one is willing to trust Helm goes on to look at the relations between belief and trust and between faith and virtue and concludes with an exploration of one particular type of belief about oneself the belief that one is oneself a believer This is a book for anyone interested in the basis of religious faith

Between Faith and Doubt John Hick, 2010-04-09 Can God's existence be proved

Faith, Reason, & Earth History Leonard Brand, 2009 Faith Reason and Earth History presents Leonard Brand's argument for constructive thinking about origins and earth history in the context of Scripture showing readers how to analyze available scientific data and approach unsolved problems Faith does not need to fear the data but can contribute to progress in understanding earth history within the context of God's Word while still being honest about unanswered questions In this patient explanation of the mission of science the author models his conviction that above all it is essential that we treat each other with respect even if we disagree on fundamental issues The original edition of this work 1997 was one of the first books on this topic written from the point of view of an experienced research scientist A career biologist paleontologist and teacher Brand brings to this well illustrated book a rich assortment of practical scientific examples This thoughtful and rigorous presentation makes Brand's landmark work highly useful both as a college level text and as an easily accessible treatment for the educated lay person
