Rebelling Loving And Liberation:

Rebelling, Loving, and Liberation Paul Frederic Schmidt, 1971

Becoming a Cosmopolitan Jason D Hill, 2023-06-14

The philosopher and author of *Beyond Blood Identities* offers a new paradigm of persona freedom and moral self possession. As a Jamaican immigrant arriving in the United States at the age of twenty, Jason Hill noticed how often Americans identified themselves in terms of race and ethnicity. He observed, for example, the reluctance of West Indians to join black causes for fear of losing their identity. He began to ask himself what sort of world he wanted to live in, a quest that in time led him to the idea of the cosmopolitan. In *Becoming a Cosmopolitan*, Jason D Hill argues that we need a new understanding of the self. He revives the idea of the cosmopolitan, the person who identifies the world as home. Arguing for the right to forget where we came from, Hill proposes a new moral cosmopolitanism for the new millennium.

The Way of the Beloved Robert

Arsdale, Diana Van Arsdale, 2016-11-18

The foundation of the Way of the Beloved is discovered in the heart of love itself, where there lives and moves a will to exaltation of the other. To truly love another is to will the spiritual ideal upon that beloved one. When there is a mutual intention to exalt, infusing the daily life of a man and woman, they enter into the Way of the Beloved. This handbook is an attempt to put into book form what authors Robert and Diana Van Arsdale have been teaching to small groups of couples since 1976. Their workshops offer an ageless set of protocols for the transformation of the love relationship between a woman and a man into a path of spiritual development. Here they present an integrated body of progressive experiential exercises and meditations that were taught originally by Herman Rednick. Simply stated, The Way of the Beloved teaches a couple how to actualize the potential of their relationship through the intensification of love and compassion. Designed for couples in search of spiritual and emotional exploration, this guide offers methods intended to help them realize a vision of love fulfilled.

Modern Dogma and the Rhetoric of Assent Wayne C. Booth, 1974-10-15

When should I change my mind? What can I believe and what must I doubt? In this new philosophy of good reasons, Wayne C. Booth exposes five dogmas of modernism that have too often inhibited efforts to answer these questions. Modern dogmas teach that you cannot reason about values and that the job of thought is to doubt whatever can be doubted, and they leave those who accept them crippled in their efforts to think and talk together about whatever concerns them most. They have willed upon us a befouled rhetorical climate in which people are driven to two self-destructive extremes: defenders of reason becoming confined to ever narrower notions of logical or experimental proof, and defenders of values becoming more and more irresponsible in trying to defend the heart, the gut, or the gonads. Booth traces the consequences of modernist assumptions through a wide range of inquiry and action in politics, art, music, literature, and in personal efforts to find identity or a self. In casting doubt on systematic doubt, the author finds that the dogmas are being questioned in almost every modern discipline. Suggesting that they be replaced with a rhetoric of systematic assent, Booth discovers a vast neglected reservoir of good reasons, many of them known to classical students of rhetoric, some still to be explored. These good reasons are here restored.

to intellectual respectability suggesting the possibility of widespread new inquiry in all fields into the question When should I change my mind

Nature's Web Peter Marshall, 2015-02-12 This powerful book provides the first comprehensive overview of the intellectual roots of the worldwide environmental movement from ancient religions and philosophies to modern science and ethics and synthesizes them into a new philosophy of nature in which to ground our moral values and social action It traces the origins and evolution of the dominant worldview that has built our industrial technocratic man centered civilization and brought us to the current ecological crisis At the same time it uncovers an alternative cultural tradition in the world's different religions and philosophies and describes how these ideas are now surfacing and coalescing to form an ecological sensibility and a new vision of nature which recognizes the inter relatedness of all living things Finally this book integrates these varied traditions with modern physics and the science of ecology into a larger philosophical whole that provides the environmental movement with a comprehensive vision of an organic and sustainable society in harmony with nature As ecological disasters continue to threaten our planet becoming worse with every passing moment of indifference it has become clear that we must take action We must change our relationship with nature and return to the days when our lives were intimately connected to and dependent upon the natural world Nature's Web lays the foundations for that change by explaining where our complex ideas about nature come from why they are wrong and what we can do to change them

The Rebel Albert Camus, 2012-09-19 By one of the most profoundly influential thinkers of our century The Rebel is a classic essay on revolution that resonates as an ardent eloquent and supremely rational voice of conscience for our tumultuous times For Albert Camus the urge to revolt is one of the essential dimensions of human nature manifested in man s timeless Promethean struggle against the conditions of his existence as well as the popular uprisings against established orders throughout history And yet with an eye toward the French Revolution and its regicides and deicides he shows how inevitably the course of revolution leads to tyranny Translated from the French by Anthony Bower
