The Four Tendencies Gretchen Rubin, 2017-09-12 NEW YORK TIMES BESTSELLER Are you an Upholder a Questioner an Obliger or a Rebel From the author of *Better Than Before* and *The Happiness Project* comes a groundbreaking analysis of personality type that will immediately improve every area of your life Melissa Urban co founder of the Whole30 During her multibook investigation into human nature Gretchen Rubin realized that by asking the seemingly dry question How do I respond to expectations we gain explosive self knowledge She discovered that based on their answer people fit into Four Tendencies Upholders meet outer and inner expectations readily Discipline is my freedom Questioners meet inner expectations but meet outer expectations only if they make sense If you convince me why I ll comply Obligers the largest Tendency meet outer expectations but struggle to meet inner expectations therefore they need outer accountability to meet inner expectations You can count on me and I m counting on you to count on me Rebels the smallest group resist all expectations outer and inner alike They do what they choose to do when they choose to do it and typically they don t tell themselves what to do You can t make me and neither can I Our Tendency shapes every aspect of our behavior so using this framework allows us to make better decisions meet deadlines suffer less stress and engage more effectively It s far easier to succeed when you know what works for you With sharp insight compelling research and hilarious examples *The Four Tendencies* will help you get happier healthier more productive and more creative ACT Advanced Practice Kaplan Test Prep, 2017-09-05 If you re looking to get a top score on the ACT Kaplan s ACT Advanced Practice workbook has the high difficulty practice and expert strategies you need to face the toughest questions with confidence Nine practice sets with advanced high difficulty questions to help you score the most points More than 600 questions with detailed answers and explanations

Rebels and Conflict Escalation Isabelle Duyvesteyn, 2021-06-10 Violence during war often involves upswings and downturns that have to date been insufficiently explained Why does violence at a particular point in time increase in intensity and why do actors in war decrease the level of violence at other points Duyvesteyn discusses the potential explanatory variables for escalation and de escalation in conflicts involving states and non state actors such as terrorists and insurgents Using theoretical arguments and examples from modern history this book presents the most notable causal mechanisms or shifts in the shape of propositions that could explain the rise and decline of non state actor violence after the start and before the termination of conflict This study critically reflects on the conceptualisation of escalation as linear rational and wilful and instead presents an image of rebel escalation as accidental messy and within a very limited range of control

Reconsidering Tu Fu Eva Shan Chou, 2006 Tu Fu is by universal consent the greatest poet of the Chinese tradition In the epochal An Lushan rebellion he alone of his contemporaries consistently recorded in poetry the great events and pervasive sufferings of the time For a millennium now Tu Fu's poetry has been accepted as epitomizing the Chinese moral conscience at its highest and as such his work has been placed almost beyond the reach of criticism Indeed objectivity about Tu Fu has often been viewed as criticism of him

After the Education Wars Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers After the Education Wars helps us to see a better way forward Cathy N Davidson The New York Times Book Review After the Education Wars is an important book that points the way to genuine reform Diane Ravitch author of *Reign of Error* and *The Death and Life of the Great American School System* A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world After the Education Wars explains how the market based measures and carrot and stick incentives informing today's reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state's once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what's needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools

States in Disguise Belgin San-Akca, 2017-08-15 There is a long history of state governments providing support to nonstate armed groups fighting battles in other countries Examples include Syria's aid to Hamas

Ecuador's support for FARC and Libya's donation of arms to the IRA. What motivates states to do this? And why would rebel groups align themselves with these states? In *States in Disguise*, Belgien San Akca builds a rigorous theoretical framework within which to study the complex and fluid network of relationships between states and rebel groups including ethnic and religious insurgents, revolutionary groups, and terrorists. She proves that patterns of alliances between armed rebels and modern states are hardly coincidental but the result of systematic and strategic choices made by both states and rebel groups. San Akca demonstrates that these alliances are the result of shared conflictual material and ideational interests, and her theory shows how to understand these ties via the domestic and international environment. Drawing from an original data set of 455 groups, their target states, and supporters over a span of more than sixty years, she explains that states are most likely to support rebel groups when they are confronted with internal and external threats simultaneously, while rebels select strong states and democracies when seeking outside support. She also shows that states and rebels look to align with one another when they share ethnic, religious, and ideological ties. Through its broad chronological sweep, *States in Disguise* reveals how and why the phenomenon of state and rebel group alliances has evolved over time.

Economic Aspects of Genocides, Other Mass Atrocities, and Their Prevention Charles H. Anderton, Jurgen Brauer, 2016-05-09

Alongside other types of mass atrocities, genocide has received extensive scholarly, policy, and practitioner attention. Missing, however, is the contribution of economists to better understand and prevent such crimes. This edited collection by 41 accomplished scholars examines economic aspects of genocides, other mass atrocities, and their prevention. Chapters include numerous case studies: e.g., California's Yana people, Australia's Aborigines, Stalin's killing of Ukrainians, Belarus, the Holocaust, Rwanda, DR Congo, Indonesia, Pakistan, Colombia, Mexico's drug wars, and the targeting of suspects during the Vietnam War, probing literature reviews, and completely novel work based on extraordinary country-specific datasets. Also included are chapters on the demographic, gendered, and economic class nature of genocide. Replete with research and policy-relevant findings, new insights are derived from behavioral economics, law, and economics, political economy, macroeconomic modeling, microeconomics, development economics, industrial organization, identity economics, and other fields. Analytical approaches include constrained optimization theory, game theory, and sophisticated statistical work in data mining, econometrics, and forecasting. A foremost finding of the book concerns atrocity architects' purposeful strategic use of violence, often manipulating nonrational proclivities among ordinary people to sway their participation in mass murder. Relatively understudied in the literature, the book also analyzes the options of victims before, during, and after mass violence. Further, the book shows how well-intended prevention efforts can backfire and increase violence, how wrong post-genocide design can entrench vested interests to reinforce exclusion of vulnerable peoples, and how businesses can become complicit in genocide. In addition to the necessity of healthy opportunities in employment, education, and key sectors in prevention work, the book shows why new genocide prevention laws and institutions must be based on reformulated incentives that consider insights

from law and economics behavioral economics and collective action economics **Mechanical Choices** Michael S. Moore, 2020-05-08 *Mechanical Choices* details the intimate connection that exists between morality and law the morality we use to blame others for their misdeeds and the criminal law that punishes them for these misdeeds This book shows how both law and morality presuppose the accuracy of common sense a centuries old psychology that defines people as rational agents who make honorable choices and act for just reasons It then shows how neuroscience is commonly taken to challenge these fundamental psychological assumptions Such challenges four in number are distinguished from each other by the different neuroscientific facts from which they arise the fact that human choices are caused by brain events the fact that those choices don't cause the actions that are their objects but are only epiphenomenal to those choices the fact that those choices are identical to certain physical events in the brain and the fact that human subjects are quite fallible in their knowledge of what they are doing and why The body of this book shows how such challenges are either based on faulty facts or misconceived as to the relevance of such facts to responsibility The book ends with a detailed examination of the neuroscience of addiction an examination which illustrates how neuroscience can help rather than challenge both law and morality in their quest to accurately define excuses from responsibility SAT Premium Study Guide with 7 Practice Tests Sharon Weiner Green, Ira K.
