Reborn Buildings:

Architecture Reborn Kenneth Powell, 2005-01-01 Architecture Reborn is a detailed investigation into the adaptation and conversion of existing buildings as a distinctive area of architectural design. The transformation of buildings now constitutes a major element in the workload of architects worldwide as well as making environmental sense. A conversion is often a simpler and more economic process than a new build project. This book shows how today's architects have called on historical structures and brought them back into everyday life. This book has imperative information for anyone involved in architecture planning and regeneration as well as the layperson interested in keeping up to date with this fast moving and often controversial area of design.

Building Adaptation James Douglas, 2006-08-11 As existing buildings age, nearly half of all construction activity in Britain is related to maintenance, refurbishment and conversions. Building adaptation is an activity that continues to make a significant contribution to the workload of the construction industry. Given its importance to sustainable construction, the proportion of adaptation works in relation to new build is likely to remain substantial for the foreseeable future, especially in the developed parts of the world. *Building Adaptation* Second Edition is intended as a primer on the physical changes that can affect older properties. It demonstrates the general principles, techniques and processes needed when existing buildings must undergo alteration, conversion, extension, improvement or refurbishment. The publication of the first edition of *Building Adaptation* reflected the upsurge in refurbishment work. The book quickly established itself as one of the core texts for building surveying students and others on undergraduate and postgraduate built environment courses. This new edition continues to provide a comprehensive introduction to all the key issues relating to the adaptation of buildings. It deals with any work to a building over and above maintenance to change its capacity, function or performance.

Lost Buildings Jonathan Glancey, 2009 Surveys buildings that have been lost to antiquity, war, demolition, natural catastrophes and other circumstances as well as designs which were never built.

Rehabilitation of Historic Buildings Frederec Ellsworth Kley, 1980 **Building Lives** Neil Harris, 1999-01-01 Drawing on sources including Masonic manuals, tourist guidebooks and religious texts, this illustrated study explores the rites of building passage over the past 150 years. The author suggests that architecture is a performing art as well as a fine art.

Great Buildings DK Publishing, 2012-08-20 *Great Buildings* is a fabulous photographic tour of more than 50 of the world's most magnificent buildings. From monumental pyramids to the latest chrome and glass skyscrapers and sculptural looking museums, the buildings are arranged chronologically, providing an excellent introduction to the history of architecture.

Buildings Reborn Barbaralee Diamonstein, 1978 Before and after pictures of buildings which have been renovated for different uses from what they originally had, with brief descriptions of the projects. In alphabetical order by city. *Boomer Buildings* Mitchell/Giurgola Architects, 2005 This book presents six case study buildings, each more than a generation old that were on the brink of oblivion. In each case, Mitchell/Giurgola Architects worked closely with the client to determine how the

project could be salvaged by incorporating updated program elements to serve a new generation of users All six case studies present in detail how each project is analysed from its energy use and curtain wall performance to its mechanical electrical and plumbing systems and structural stability The results are born again buildings created for a fraction of the cost and consuming far fewer materials than a new facility built from scratch Mitchell Giurgola documents a new more sustainable approach to design and construction that builds on the past and makes the old better than new *Buildings*, 1983 The Construction and Building Management Journal Old Buildings, New Forms Francoise Bollack, 2013-11-12 It is clear that working with historic structures is both more environmentally sustainable and cost effective than new architecture and construction and many believe that the best design occurs at the intersection of old and new Fran oise Astorg Bollack presents 28 examples gathered in the United States and throughout Europe and the Middle East Some are well known Mass MOCA Market Santa Caterina in Barcelona Neues Museum in Berlin and others are almost anonymous But all demonstrate a unique and appropriate solution to the problem of adapting historic structures to contemporary uses This survey of contemporary additions to older buildings is an essential addition to the architectural literature I have always loved old buildings An old building is not an obstacle but instead a foundation for continued action Designing with them is an exhilarating enterprise adding to them grafting inserting knitting new pieces into the existing built fabric is endlessly stimulating Fran oise Astorg Bollack **Understanding Building Stones and Stone Buildings** John A. Hudson, John W. Cosgrove, 2019-04-24 This book covers the wide spectrum of subjects relating to obtaining and using building stones starting with their geological origin and then describing the nature of granites volcanics limestones sandstones flint metamorphic stones breccias and conglomerates with emphasis being placed on how to recognise the different stones via the many illustrated examples from Great Britain and other countries The life of a building stone is explained from its origin in the quarry through its exposure to the elements when used for a building to its eventual deterioration The structure of stone buildings is then discussed with explanations of the mechanics of pillars lighthouses and walls arches bridges buttresses and roof vaults plus castles and cathedrals The sequence of the historical architectural styles of stone buildings is explained from the early days through to postmodern buildings Special attention is paid to two famous architects the Roman Vitruvius and the English Sir Christopher Wren who designed and supervised the construction of St Paul s Cathedral in London To demonstrate many of the concepts presented two exemplary stone buildings are described in detail the Albert Memorial in London and Durham Cathedral in northern England The former building is interesting because it is comprised of a cornucopia of different building stones and the latter building because of its architecture and sandstone decay mechanisms In the final Chapter ruined stone buildings are discussed the many reasons for their decay and the possibility of their rebirth via digital recording of their geometry The book has over 350 pages and is illustrated with more than 450 diagrams and colour photographs of both the various stones and the associated stone buildings Readers knowledge of the subject will be

greatly enhanced by these images and the related explanatory text A wide ranging references and bibliography section is also included **Building**, 1926 **Buildings Cities Life** Eberhard Zeidler, 2013-08-26 Renowned architect Eberhard Zeidler tells his story in a two volume book that explores his early life in Germany and his years in Canada after he moved there in 1951 Architect of Toronto's Eaton Centre and Trump International Hotel and Tower Zeidler has left his stamp on the urban landscape of Canada the United States and the rest of the world **Reborn Buildings** Arian Mostaedi, 2003 The lack of space in big cities and the desire to preserve old architecture great value help to explain the continuing desire to retrieve spaces of the past as locations for new dwellings The adaptation of the conditions of the old building to present day living needs demands delicate technical and documentary work by the architect This volume explores a variety of ideas or reconditioning historical spaces for domestic use complete with plans and pictures of the original state the development of the project and the final result in which a suggestive fertile dialogue is struck between past and present **Creative Reuse of Buildings: Volume One** Derek Latham, 2016-01-08 Addresses the advantages and practicalities involved in the issue of the creative reuse of existing buildings **All about Old Buildings** Diane Maddex, 1985 *How Buildings Learn* Stewart Brand, 1995-10-01 A captivating exploration of the ever evolving world of architecture and the untold stories buildings tell When a building is finished being built that isn't the end of its story More than any other human artifacts buildings improve with time if they're allowed to Buildings adapt by being constantly refined and reshaped by their occupants and in that way architects can become artists of time rather than simply artists of space From the connected farmhouses of New England to I M Pei's Media Lab from the evolution of bungalows to the invention of Santa Fe Style from Low Road military surplus buildings to a High Road English classic like Chatsworth this is a far ranging survey of unexplored essential territory Discover how structures become living organisms shaped by the people who inhabit them and learn how architects can harness the power of time to create enduring works of art through the interconnected worlds of design function and human ingenuity **Building in Existing Fabric** Christian Schittich, 2012-12-10 a disused power station is converted into a cultural centre an old barn is made into a residential house All around us we encounter buildings whose original purpose has rendered them obsolete and which now offer space for new uses The construction and building requirements confronting the architect are as varied and individual as the buildings themselves This publication examines a wide range of realized examples highlighting successful and innovative solutions from the rehabilitation of preserved monuments to the renovation or renewal of existing buildings from the reuse of a gothic monastery or the former industrial buildings of Fiat Lingotto to the renovation of structures made of pre cast concrete panels Introductory essays by specialist authors examine the economical technical historical aspects of the topic and the projects presented are documented fully with illustrations plans and details which have been specially produced by the editorial department of DETAIL **Congressional Record** United States.
