Transforming Societies after Political Violence Brandon Hamber, 2009-06-12 Paraphrasing Descartes we may say that one method is to take the reader into your confidence by explaining to him how you arrived at your discovery the other is to bully him into accepting a conclusion by parading a series of propositions which he must accept and which lead to it The first method allows the reader to re think your own thoughts in their natural order It is an autobiographical style Writing in this style you include not what you had for breakfast on the day of your discovery but any significant consideration which helped you arrive at your idea In particular you say what your aim was what problems you were trying to solve and what you hoped from a solution of them The other style suppresses all this It is didactic and intimidating J W N Watkins Confession is Good for Ideas Watkins 1963 pp 667 668 I began writing this book over 12 years ago It was started in the midst of the South African Truth and Reconciliation Commission TRC It is an exploration of what I have learned from the process During the TRC I was working at the Centre for the Study of Violence and Reconciliation CSVr in South Africa primarily with people who testified before the Commission but also on a range of research and policy initiatives in the area that is now called transitional justice I have written about the TRC process extensively
