Recalling the Wild Mary Lawlor,2000 Brutes in Suits John Pettegrew,2007-07-16 Publisher description *Writing the Northland* Barbara Stefanie Giehmann,2011 **Quest West** Richard Lehan,2014-05-05 Few spaces remain as central to American consciousness as the western frontier The vast territory which for generations fueled the desires and conquests of artists philosophers and politicians alike now offers new discoveries in Richard Lehan s *Quest West* Through an intellectual and cultural history of the frontier experience Lehan details the transformations of ideas and literary forms that occurred as the country expanded to the west and demonstrates how the wilderness and then by turn the urban frontier represent an ideological summary of the nation itself His study involves the foundations of belief and the realms of evolving interpretations from mythic destiny to the more regional address of historicism In both instances the desire is to find meaning in the lost past By tracing the evolution of Frederick Jackson Turner s famous thesis that the unchartered frontier ended in 1890 and was replaced with an equally precarious urban landscape Lehan argues that the two spaces became the basis for a division still evident in America today Historically the wilderness accommodated conservative thinking while urban environments proved more conducive to liberal values Ideologies stemming from the two regions as Lehan shows found literary equivalents in fictional narratives ranging from subgenres like the Western and naturalism to modern forms like neorealism and noir extending even into the postmodern Lehan offers a view of the West as a cultural phenomenon borne of ideological changes encompassing historical and literary movements from Puritan perspectives to the revisionist claims of Mark Twain and Walt Whitman from homesteading to imperial ambition *Quest West* traces these competing ideas as they appear in the works of major American writers such as James Fenimore Cooper Walt Whitman Willa Cather William Faulkner F Scott Fitzgerald John Dos Passos Nathanael West and John Steinbeck An important work of literary and historical scholarship *Quest West* presents compelling evidence that the meaning of America remains inseparable from the march of seminal ideas westward

Jack London is the definitive reference work on the author **The Oxford Handbook of American Literary Naturalism** Keith Newlin, 2011-05-26 After its heyday in the late nineteenth and early twentieth century naturalism a genre that typically depicts human beings as the product of biological and environmental forces over which they have little control was supplanted by modernism a genre in which writers experimented with innovations in form and content In the last decade the movement is again attracting spirited scholarly debate The Oxford Handbook of American Literary Naturalism takes stock of the best new research in the field through collecting twenty eight original essays drawing upon recent scholarship in literary and cultural studies The contributors offer an authoritative and in depth reassessment of writers from Stephen Crane Frank Norris Theodore Dreiser and Jack London to Kate Chopin Edith Wharton Ernest Hemingway Richard Wright John Steinbeck Joyce Carol Oates and Cormac McCarthy One set of essays focus on the genre itself exploring the historical contexts that gave birth to it the problem of definition its interconnections with other genres the scientific and philosophical ideas that motivate naturalist authors and the continuing presence of naturalism in twenty first century fiction Others examine the tensions within the genre the role of women and African American writers depictions of sexuality the problem of race and the critique of commodity culture and class A final set of essays looks beyond the works to consider the role of the marketplace in the development of naturalism the popular and critical response to the works and the influence of naturalism in the other arts *Silent Film and U.S. Naturalist Literature* Katherine Fusco, 2016-03-17 Typically studies of early cinema's relation to literature have focused on the interactions between film and modernism When film first emerged however it was naturalism not modernism competing for the American public's attention In this media ecosystem the cinema appeared alongside the works of authors including Charlotte Perkins Gilman Jack London and Frank Norris Drawing on contemporaneous theories of time and modernity as well as recent scholarship on film narrative and naturalism this book moves beyond traditional adaptation studies approaches to argue that both naturalism and the early cinema intervened in the era's varying experiments with temporality and time management Specifically it shows that American naturalist novels are constructed around a sustained formal and thematic interrogation of the relationship between human freedom and temporal inexorability and that the early cinema developed its norms in the context of naturalist experiments with time The book identifies the silent cinema and naturalist novel's shared privileging of narrative progress over character development as a symbolic solution to social and aesthetic concerns ranging from systems of representation to historiography labor reform miscegenation and birth control This volume thus establishes the dynamic exchange between silent film and naturalism arguing that in the products of this exchange personality figures as excess bogging down otherwise efficient narratives of progress Considering naturalist authors and a diverse range of early film genres this is the first book length study of the reciprocal media exchanges that took place when the cinema was new It will be a valuable resource to those with interests in Adaptation Studies American Literature Film History Literary Naturalism Modernism and Narrative Theory **A Study**
