Peace & Conflict Research Juergen Dedring, 1976-09-01 Conflict, Peace, Security and Development Helen Hintjens, Dubravka Zarkov, 2014-08-13 Whilst classical approaches linked development with peace security has become central to understandings of both war and peacetime This book uniquely reflects on how to deal with the convergence of war and peace in the context of global economic and geo political development It addresses methodological challenges in contemporary approaches to conflict violence security peace and development Two dominant contemporary approaches are selected for debate on methodologies and ethical choices rational choice and identity based theorizing The chapters are arranged as dialogues around contending approaches to better understand how the interlocking fields of violent conflict peace development and security can be researched and understood The book considers how theoretical and methodological approaches relate to different ethical and political choices including around engagement and intervention in the four interwoven fields Theoretical methodological and ethical issues emerge from the critical reviews of academic discourses and case study based chapters from across the world including Sri Lanka Ghana Colombia and Rwanda This book is an invaluable resource for postgraduate students and researchers in Development Studies Conflict Studies Peace Studies and Security Studies *Handbook of Research on the Impact of Culture in Conflict Prevention and Peacebuilding* Essien, Essien, 2020-03-20 The contemporary conflict scenarios are beyond the reach of standardized approaches to conflict resolution Given the curious datum that culture is implicated in nearly every conflict in the world culture can also be an important aspect of efforts to transform destructive conflicts into more constructive social processes Yet what culture is and how culture matters in conflict scenarios is contested and regrettably unexplored The Handbook of Research on the Impact of Culture in Conflict Prevention and Peacebuilding is a critical publication that examines cultural differences in conflict resolution based on various aspects of culture such as morals traditions and laws Highlighting a wide range of topics such as criminal justice politics and technological development this book is essential for educators social scientists sociologists political leaders government officials academicians conflict resolution practitioners world peace organizations researchers and students **Pathways for Peace** United Nations, World Bank, 2018-04-13 Violent conflicts today are complex and increasingly protracted involving more nonstate groups and regional and international actors It is estimated that by 2030 the horizon set by the international community for achieving the Sustainable Development Goals more than half of the world's poor will be living in countries affected by high levels of violence Information and communication technology population movements and climate change are also creating shared risks that must be managed at both national and international levels Pathways for Peace is a joint United Nations World Bank Group study that originates from the conviction that the international community's attention must urgently be refocused on prevention A scaled up system for preventive action would save between US 5 billion and US 70 billion per year which could be reinvested in reducing poverty and improving the well being of

populations The study aims to improve the way in which domestic development processes interact with security diplomacy mediation and other efforts to prevent conflicts from becoming violent It stresses the importance of grievances related to exclusion from access to power natural resources security and justice for example that are at the root of many violent conflicts today Based on a review of cases in which prevention has been successful the study makes recommendations for countries facing emerging risks of violent conflict as well as for the international community Development policies and programs must be a core part of preventive efforts when risks are high or building up inclusive solutions through dialogue adapted macroeconomic policies institutional reform and redistributive policies are required Inclusion is key and preventive action needs to adopt a more people centered approach that includes mainstreaming citizen engagement Enhancing the participation of women and youth in decision making is fundamental to sustaining peace as well as long term policies to address the aspirations of women and young people

Cultivating Peace International Development Research Centre (Canada), World Bank Institute, 1999 Cultivating Peace Conflict and collaboration in natural

resource management **Peace & Conflict Research** Juergen Dedring, 1976-09 Peace Research Peter Wallensteen, 2013-03-01

Comprising essays by Peter Wallensteen this book presents an overview of the thematic development of peace research which has become one of the most dynamic and innovative areas of war and conflict studies. Peace research began in the 1950s when centres were formed in the USA and Europe and today there are research institutes and departments on every continent with teaching and research programs in most countries and peace researchers contribute to the development of international studies, development research and security analysis. Prof Wallensteen has been a witness to much of this since forming the Department of Peace and Conflict Research at Uppsala University in the late 1960s and this book brings together thirteen of his articles with five new essays in one volume. The book presents articles on such key issues in peace research as the causes of war, conflict, data, conflict, diplomacy, non-violent sanctions and third party diplomacy. In this way it demonstrates how basic research can be conducted in fields often seen as unresearchable and too complicated to deal with. This volume shows that it is a matter of developing definitions, creating valid measures and finding ways of collecting information, recognising that innovations of this kind require supportive research environments. Furthermore, the results are not only useful for the growth of research activity itself but for finding ways of dealing with actual conflicts. Thus attention is also paid here to conflict prevention, peace agreements, sanctions and third party activity for preventing and ending armed conflict and building a lasting post-war peace. This book will be of great interest to all students of peace studies, conflict resolution, war and conflict studies, development studies and IR security studies in general.

A Requiem for Peacebuilding? Jorg Kustermans, Tom Sauer, Barbara Segert, 2020-12-01. This book assesses the claim that peacebuilding is a moribund international practice. Its contributors trace the origins of peacebuilding, bring back to memory its moments of triumph and reflect on the reports of its decline. The story of peacebuilding parallels the broader story of liberalism's rise and fall in world politics, including the attempt to remedy an ailing patient by administering a magic medicine. The local turn. Its contributors further write about what may come after peacebuilding as we still know it. They describe more locally rooted attempts at building peace and how they operate in the shadows of and in an ambiguous relationship with governmental and international peacebuilders. The book finally suggests that reports of the pending death of peacebuilding are probably premature. Peacebuilding is a resilient international practice apt to adjust itself to a changing environment and too important a source of legitimacy for those that wield power.

The Conflict Helix R. J. Rummel. This is a book on conflict and consensus aimed at the general reader. In active, plain and direct language it makes the seemingly abstract and complex issues simple. Its view of peace is well rounded, tough minded, one that well understands the difficult world of social and personal violence and conflict. At its heart is a simple finding: to wage peace we need to foster freedom. The human race can best achieve that simple aim by leaving people alone to form their own communities. The Conflict Helix avoids the ambiguous in favor of the categorical, the hedged, qualified statement for the direct. Rummel presents a series of

basic principles each concerning an aspect of conflict and peace psychological interpersonal societal international and each aspect having its own master principle These principles are not mere organizational props but are deeply theoretical and empirically fundamental The volume expresses the core ideas results and conclusions of Rummel s major five volume work on Understanding Conflict and War In discarding technical material and focusing on principles and meaning The Conflict Helix presents an executive summary of a lifetime of work in a digestible form In light of recent events in Europe Asia and Latin American this work takes on a special poignancy for the developing no less than the industrialized worlds Hence this book should be of value to the general reader as well as professionals and advanced students of international politics
