**Recent Archaeological Discoveries in Pakistan** Ahmad Hasan Dani, Unesco, 1988      *Recent Archaeological Discoveries in Pakistan* Dani, A. H., 1988      *Between History and Archaeology: Papers in honour of Jacek Lech* Dagmara H. Werra, Marzena Woźny, 2018-02-28 A collection of forty six papers papers in honour of Professor Jacek Lech compiled in recognition of his research and academic career as well as his inquiry into the study of prehistoric flint mining Neolithic flint tools and beyond and the history of archaeology      *Looking for the Aryans* Ram Sharan Sharma, 1995 Who were the Aryans Where did they come from Did they always live in India The Aryan problem has been attracting fresh attention in academic social and political arenas This book identifies the main traits of Aryan culture and follows the spread of their cultural markers Using the latest archaeological evidence and the earliest known Indo European inscriptions on the social and economic features of Aryan society the distinguished historian R S Sharma throws fresh light on the current debate on whether or not the Aryans were the indigenous inhabitants of India This book is essential reading for those interested in the history of India and its culture      **East and West** ,2006      *The Silk Roads* Vadime Elisseeff, 2000 A look at the cultural or intercultural exchange that took place in the Silk Roads and the role this has played in the shaping of cultures and civilizations      *Early Civilizations of the Old World* Charles Keith Maisels, 2003-12-16 Tracing the development of some of the earliest and key civilizations in history Early Civilisations of the Old World explains how particular forms of social structure and cultural interaction developed from before the Neolithic period      *The Grandeur of Gandhara* Rafi U. Samad, 2011 The northwestern regions of Pakistan and southeastern regions of Afghanistan were once the heart of a highly developed civilization whose cultural impact was felt from China to Persia A major center of Buddhism its cultural attainments were highlights of ancient civilization The author s research accompanied by some 60 illustrations offers Americans an entirely new understanding of the desolate region shown on the nightly news The Persian Greek and Central Asian invasions of Gandhara rather than causing wide scale destruction in the region promoted the development of a multi cultural multi ethnic society After a gestation period of about half a millennium this region blossomed into a unique civilization in the opening years of the Common Era Detailed archaeological excavations were started at sites in northern Pakistan and Afghanistan in the late 19th century Through these excavations eminent archaeologists such as Aurel Stein Alexander Cunningham John Marshall J Barthoux and Professor A H Dani recovered hundreds of thousands of beautiful stone sculptures belonging to the Gandhara Civilization In the last century or so much has been written about the artistic quality of these beautiful stone sculptures But hardly anything has been written about the Civilization itself that gave birth to these extraordinary pieces of art In this book an effort has been made to present Gandhara in its wider perspective highlighting the different features of a unique civilization in which many different races contributed and many cultures merged to bring about a major sociological change and establish a distinct cultural identity in this region of the South Asian sub continent This book

is based on the author's analysis of archaeologists' reports, information gathered through extended visits to numerous archaeological sites associated with the lost Gandhara Civilization including those in the Taxila, Peshawar, Charsadda, Mardan and Swat regions in Pakistan and study in museums. His research reveals a great deal of continuity in the field of socio-cultural development of the region which is referred to in this book as Greater Gandhara from the time it became a part of the Achaemenid Empire in the 6th century BCE till the end of Kidara Kushan's rule in the 5th century CE. Further, it reveals that after the Achaemenids had established the physical and administrative infrastructure in Greater Gandhara, the continuity in socio-cultural development in the region was maintained mainly by the growing Buddhist population. This book illustrates the spirit of independence and features in the character of the ancient people of the Gandhara region which facilitated the sustained progress towards the emergence of the Gandhara Civilization. Following the invasion of Alexander the Great, his successors had no difficulty in colonizing Bactria, Northern Afghanistan and Sogdiana, Uzbekistan, but they could not do the same in Gandhara. Similarly, the Scythians, Parthians and the Kushans ruled over the Central Asian region as colonizers but not so in Gandhara. Here they ruled not over the people but with the people. Their administration was highly decentralized with the locals playing a major role in the regional administration and having a major say in the social and cultural affairs of the entire population. Finally, the book highlights the interactive environment which prevailed in Gandhara throughout the transient and mature phases of the Gandhara Civilization. Alexander's companions hobnobbing with the naked fakirs of Taxila, Menander the Great, the Indus Greek ruler, finding time to engage in prolonged question and answer sessions with Buddhist scholars at the monastery near Sagala, Sialkot, and the greatest of the Kushan conquerors, Kanishka, finding pleasure in the company of local intellectuals and artists such as Asvaghosha and Vasumitra, and presiding over the official launch of Mahayana Buddhism.

**The Lost River** Michel Danino, 2010-03-12 The Indian subcontinent was the scene of dramatic upheavals a few thousand years ago. The Northwest region entered an arid phase and erosion, coupled with tectonic events, played havoc with river courses. One of them disappeared. Celebrated as Sarasvati in the Rig Veda and the Mahabharata, this river was rediscovered in the early nineteenth century through topographic explorations by British officials. Recently, geological and climatological studies have probed its evolution and disappearance, while satellite imagery has traced the river's buried courses, and isotope analyses
