## **Recent Urban And Regional Developments In Poland And The Netherlands:**

**Spatial Planning and Urban Development in the New EU Member States** Uwe Altröck, Simon Güntner, 2017-03-02

Accession to the EU in May 2004 was a historic milestone for the spatial and urban development of the new member states. Meanwhile the social and economic transition during the pre accession phase already brought about radical changes in national urban systems and new challenges for regional development. In this edited volume a carefully selected and specially commissioned set of articles written by experts from both the new and the old EU member states presents a comprehensive assessment of emerging political and planning solutions at local, regional, national and EU levels. Topics include brownfield redevelopment in the Czech Republic, urban sprawl in Hungary, the upgrading and integration of marginalized Roma settlements in Eastern Slovakia and sustainable coastal management in Cyprus.

**Foreign Direct Investment and Regional Development in East Central Europe and the Former Soviet Union** David Turnock, 2017-11-28. With the achievement of further EU and NATO enlargement a critical political and economic lens is now focused on East Central Europe and to a lesser extent the other former communist states. Economic growth in each transition state and more broadly the region pivots around the prospects for foreign direct investment (FDI) with decisions on where foreign investors will locate their projects now vitally important. This book, the first one devoted to a geographical survey concentrating specifically on FDI in the region, brings together a wide range of prominent authors from the US and Europe including the late Frank Carter to provide a timely and critical examination of the importance of foreign investment. It presents a detailed analysis of location patterns and their significance for regional development with particular emphasis given to the important socioeconomic and political consequences of uneven distribution of FDI across the region and its constituent countries. Divided into two parts, the book first deals with general overarching themes and issues before applying these to more specific country case studies. The second part deals with regional studies focusing broadly on the Western Balkans and Bulgaria before looking at specific economic sectors in individual countries.

**Entrepreneurship in a Regional Context** Michael Fritsch, David Storey, 2017-08-17. Enterprise and entrepreneurship is of strong interest to policy makers because new and small firms can be a key contributor to job and wealth creation. However this contribution varies spatially with some areas in a country having new firm formation rates that are up to three or four times higher than others. The vast majority of these new firms begin in the geographical area in which the founder lives, works or was born, emphasising that entrepreneurship is a local event. The book documents a diversity of research approaches to examining the regional determinants of entrepreneurship in countries as contrasting as India and Sweden. The Editors call is for scholars to better understand the long run factors that influence enterprise at the local and regional level. For policy makers the Editors' challenge is for them to be much clearer about the targets for their policies. Is it new firms, new jobs, productivity and does it matter where these targets are delivered? This book was published as a special issue of *Regional Studies*.

*Entrepreneurial Neighbourhoods* Maarten van Ham, Darja

Reuschke, Reinout Kleinhans, Colin Mason, Stephen Syrett, 2017-07-28 Despite the growing evidence on the importance of the neighbourhood entrepreneurship studies have largely neglected the role of neighbourhoods This book addresses the nexus between entrepreneurship neighbourhoods and communities confirming not only the importance of the local in entrepreneurship but also filling huge gaps in the knowledge base regarding this tripartite relationship **Regional**

Dillinger,2007-01-01 Regional economic development is an interest of policymakers throughout the Europe and Central Asia ECA region One of its principal aims is to reduce poverty in lagging regions by stimulating local economic growth However problems exist with this approach First it may miss the target Although geographical concentrations of poverty exist poor people also live in regions that are on average rich Second the sources of the problem may be misdiagnosed Poverty is not only related to where people are but to who people are In ECA poverty is associated with low levels of education and people who are too young or too old to participate in the labor force Under these circumstances efforts to bring higher wage employment opportunities to poor regions may have little immediate benefit for the people who live there Third relying on regional economic development to address poverty in lagging regions ignores the potential role of migration The emigration of labor rather than the immigration of capital may be a more effective means of reducing the poverty of individuals in lagging regions though this is unlikely to eliminate pockets of poverty quickly Development opportunities may exist in poor regions that markets have overlooked Interventions must be assessed carefully Some of the traditional instruments used to stimulate regional economic growth have mixed track records Comprehensive custom tailored approaches appear to be a promising alternative However governments should be modest in using regional development as a tool of poverty reduction Policies aimed at stimulating growth in poor regions should be complemented by more direct anti poverty measures including targeted transfers and investments in education and efforts to remove barriers to emigration World Bank website      European Regional Development Paweł Churski,Tomasz Herodowicz,Barbara Konecka-Szydłowska,Robert Perdał,2021-11-18 This book offers a comprehensive overview of contemporary issues of

regional development It places particular emphasis on its socio economic and socio political determinants which accompany the problem of existing and ever widening differences in the level of regional development in various parts of Europe In order to diagnose the scale of those differences and to indicate the main forces behind the divergence of development the authors propose an original systematisation of regional development factors drawing attention to the need to consider them within the framework of present day socio economic megatrends The proposed approach to the development factors is also used for the author s operationalisation of the concept of territorial capital which is at the centre of regional place based policy The wide spatial aspect of the analysis national and local and its extensive temporal scope 2004 2019 yields unique results and creates an important element of added value for this book which shows the regularities of the process of regional development in Europe at three spatial levels pan European national and intra regional Furthermore it indicates the challenges faced by regionalists who attempt to carry out research on different territorial levels with a diverse number of units 205 EU regions 16 Polish voivodeships 2 478 Polish local units and extended observation periods 2004 2017 The solutions proposed by the authors who show the potential of overcoming the barriers resulting from limited access to complete and comparable statistical data series should be inspiring for many researchers The unique results of direct research carried out on a large sample of respondents and entrepreneurs via diverse field research techniques constitute a valuable source of information on local conditions that impact contemporary development processes in less developed regions Their value is even greater because they were carried out in a unique laboratory created by the authors for testing the regularity of formation and impact of socio economic development factors in various locally determined conditions of this process It consists of purposefully selected test units LAU2 Located in a less developed region they represent all growth types and functional test units identified in the course of the research Consequently the results obtained may be generalised and applied to other areas showing similar features of territorial capital The monograph is addressed primarily to a wide group of regionalists connected with economic and social sciences as well as to practitioners involved in the implementation of development policies at various levels
