Pictorial World Of The Child:

The Pictorial World of the Child Maureen Cox, 2005-11-17 This lavishly illustrated book gives a comprehensive and scholarly account of children's understanding and appreciation of art and their developing ability to produce their own pictures. It discusses the main influences on children's picture making and considers the intriguing question: does children's art follow the same pattern of development as the history of art? As well as discussing the artistic development of typically developing children, the book also includes a discussion of children with intellectual disabilities and those with a talent for art, some of whom are children with autism. *The Child's Creation of a Pictorial World* Claire Golomb, 2004 This book examines the development of drawing and painting from several currently dominant theoretical perspectives and examines empirical data on the art work of children who are ordinary, talented, emotionally disturbed and atypically developed due to

Picturing the World Kathleen T. Isaacs, 2013 This annotated resource by veteran children's book reviewer Isaacs surveys the best 250 nonfiction informational titles for ages 3 through 10, helping librarians make informed collection development and purchasing decisions. **Children and Pictures** Richard P. Jolley, 2009-05-04 In *Children and Pictures*, Richard P. Jolley critiques both the historical and contemporary studies conducted in the field of children's making and understanding of pictures. Some highlights of *Children and Pictures* are: What develops and why in children's representational and expressive drawing, both in typical, atypical and cross-cultural populations; The developing relationship between production and comprehension of pictures; Children's understanding of pictures as symbolic representations; Practical and applied uses of drawings, particularly in clinical and legal settings; Diverse educational practices of teaching drawing across the world. Presenting up-to-date research and pointing towards future topics of study, *Children and Pictures* brings the study of children's drawings into mainstream child development studies. This is an edifying resource for students, researchers, practitioners, parents, artists and educators in the field. *A Child's Book of Art* Lucy Micklethwait, 1993 An introduction to art that uses well-known works of art to illustrate familiar words. Title page verso. *Children and Their World* Judy M. Johnson, 1990 Rich compilation of over 340 vintage cuts and vignettes from children's periodicals, turn of the century to 1920s. Spot illustrations, mortised cuts, borders, banners, much more. Royalty free. Introduction. *The Child's Creation of a Pictorial World* Claire Golomb, 1992 Explores child art as an expression of visual thinking, the symbol-making function of the brain which produces images rather than words, with more than 200 examples in color and black and white.
