Picture Within A Picture An Illustrated Guide To The Origins Of Chinese Characters:

Picture Within a Picture Zhengyu Shi, 1997 Language and History Nigel Love, 2006-04-18 When linguistics was first established as an academic discipline in the nineteenth century it was envisaged as an essentially historical study. Languages were to be treated as historical objects evolving through gradual but constant processes of change over long periods of time. In recent years however there has been much discussion by historians of a linguistic turn in their own discipline and in linguistics integrationist theory has mounted a radical challenge to the traditional notion of languages as possible objects of inquiry. Language and History develops the integrationist critique of orthodox linguistics while at the same time extending its implications to the field of history. By doing so it throws light on what is now recognized by many historians to be a crisis in their own discipline. Underlying the post modernist scepticism about traditional forms of historiography the integrationist approach reveals a more deep seated problem concerning the interface between philosophy of history and philosophy of language. With chapters from a range of leading international contributors Language and History represents a significant contribution to the developing work of the integrationists.

An Integrative Approach to Counseling Robert G. Santee, 2007-05-18 An Integrative Approach to Counseling Bridging Chinese Thought Evolutionary Theory and Stress Management offers a global and integrative approach to counseling that incorporates multiple concepts and techniques from both eastern and western perspectives. The book identifies commonalities rather than the differences between them. The book also compares and contrasts the underlying cultural assumptions of western counseling with those of the Chinese perspectives of Confucianism Daoism and Buddhism relative to integrating and applying a more global approach to helping individuals functionally adapt to challenges in their environments. The book will be used by faculty and students in those advanced undergraduate and graduate courses in psychology counseling or social work that cover such areas as introduction to counseling counseling skills and techniques counseling theories multi cultural awareness and counseling and stress management.
