Aircraft Carriers of the United States Navy Michael Green,2015-04-30 This pictorial history of US aircraft carriers illustrates the many classes and types of carriers used by the navy from before WWII to the present day In 1922 the US Navy commissioned its first small experimental aircraft carrier This was followed into service by two much larger carriers in 1927 with five more being built including three large Yorktown class prior to the Japanese attack on Pearl Harbor Then to take the offensive against the Japanese Navy the American Congress funded by far the largest carrier building program in history Since 1975 when the first of a fleet of ten nuclear powered Nimitz class carriers was commissioned The United States Navy s fleet of carriers has optimized its superpower status and worldwide power projection Yet these are due to be replaced in the decades to come with the even more sophisticated nuclear powered Gerald R Ford class Compiled and written by Michael Green Aircraft Carriers of the United States Navy contains superb images of all the different types of classes of carriers employed by the US Navy since 1922 These and its highly informative text and captions give the reader a broad overview of this fascinating subject

Essex Class Aircraft Carriers, 1943-1991 Leo Marriott,2020-12-02 A photographic history of the US Essex class aircraft carriers of World War II including the USS Intrepid that now serves as a New York City museum Essex class aircraft carriers played an essential role in the victory of the United States over Japan in the Second World War and Leo Marriott s photographic history is a fascinating introduction to them Without these remarkable ships the island hopping campaign of American forces across the Pacific towards Japan would not have been possible They also took part in the Korean and Vietnam wars that followed During the Second World War they were at the center of the powerful task groups that could put up hundreds of aircraft to support forces on the ground They were also prime targets for Japanese air attacks in particular the kamikaze suicide missions A total of twenty four were eventually commissioned including several after the end of the war The selection of rare photographs and the expert text cover the evolution of US aircraft carrier design prior to the Second World War and look at the factors which shaped the design and construction of the Essex class Included are dramatic action shots of the new breed of naval aircraft that was launched from their flight decks including Hellcat and Corsair fighters that took on the Japanese and the carrier borne jets that flew over Korea and Vietnam An outstanding book Anchorwatch A book that will surely delight all naval history enthusiasts because it well illustrates the importance that the aircraft carrier had in changing the way warfare is waged at sea On the Old Barbed Wire

Through gripping historical anecdotes and breathtaking paintings by the most respected aviation and military artists, this crucial period lives again. Begin with the earliest demonstrations of planes flying from and landing on a vessel at sea and the carrier's evolution in the period between the wars. The British, Japanese, and US fleets all obtained true carriers with their numbers growing by leaps and bounds by the onset of World War II, especially in America, which had the largest of all. Written by a renowned military historian packed with thrilling accounts of daring missions and illustrated with stirring aviation art, here is a unique look at one of the most effective weapons platforms in the world.

U. S. Navy and Marine Carrier-Based Aircraft of World War II Bert Kinzey, Rock Roszak, 2025-01-01

This book from Detail Scale is a unique look at all of the American carrier-based fighters, scout, dive bombers, and torpedo bombers of World War II. Each of the well-known aircraft types are covered, but so too are the lesser-known aircraft that reached the flying prototype stage during the war. The book also includes a section with maps showing the major battles and engagements, as well as the capital ship losses on both sides in the Pacific Theater. The final section covers Navy paint schemes and markings used on these aircraft in the years leading up to the war and how they continued to evolve during the conflict. The Navy and Marine fighter chapter covers fourteen aircraft. The most famous of these are the F2A Buffalo, F4F Wildcat, F4U Corsair, and F6F Hellcat. Also included are those aircraft that were flying operationally as the war came to an end, such as the F7F Tigercat, F8F Bearcat, and the FR-1 Fireball, although none of these arrived in theater in time to see combat. Finally, this chapter covers those aircraft that were not pursued for a variety of reasons after the prototype flew. These aircraft either carried exotic names like Airabonita, Skyrocket, Flying Pancake, Dark Shark, and Stingeree, or they were never given a name, simply being known by their designation like the Curtiss XF14C and XF15C-1 and the Boeing XF8B-1. The next chapter covers eleven torpedo bombers, scout, dive bombers, and the beginning of a new generation of attack aircraft. Again, the well-known types, including the two Curtiss aircraft named Helldiver, the Devastator, Vindicator, Dauntless, and Avenger, are covered. Other named aircraft in the chapter are the Buccaneer, Sea Wolf, and the Destroyer, while the designation-only aircraft include the Brewster XSBA-1 and SBN-1 and the Kaiser Fleetwings XBTK-1. Each aircraft section includes photographs and a history of the aircraft. For those with significant histories, each variant of the aircraft is described and illustrated. Photographs of cockpit and aircraft details, long the trademark of Detail Scale publishing, are also included for the most famous variants. The book also includes two appendices. The first provides maps and a brief history of naval combat in the Pacific Theater in World War II. The second contains a significant amount of colorful details on the paint schemes used on Navy and Marine aircraft and the general marking systems in use. This look begins with the colorful Yellow Wing aircraft of the 1930s and shows how war clouds on the horizon in 1940 began a six-year period of evolving camouflage schemes for naval combat aircraft. Details of Navy markings over the same timespan are also provided and are profusely illustrated with
