**Teaching Beginning Reading and Writing with the Picture Word Inductive Model** Emily Calhoun, 1999

In this practical guide to teaching beginning language learners of all ages Calhoun encourages us to begin where the learners begin with their developed listening and speaking vocabularies and other accumulated knowledge about the world. Engage students in shaking words out of a picture words from their speaking vocabularies to begin the process of building their reading and writing skills. Use the picture word inductive model PWIM to teach several skills simultaneously beginning with the mechanics of forming letters to hearing and identifying the phonetic components of language to classifying words and sentences through forming paragraphs and stories based on observation. Built into the PWIM is the structure required to assess the needs and understandings of your students immediately adjust the lesson in response and to use explicit instruction and inductive activities. Individual small group and large group activities are inherent to the model and flow naturally as the teacher arranges instruction according to the 10 steps of the PWIM. Students and teachers move through the model and work on developing skills and abilities in reading writing listening and comprehension as tools for thinking learning and sharing ideas.

**Visual Thinking Strategies** Philip Yenawine, 2013-10-01 2014 Outstanding Academic Title Choice What's going on in this picture? With this one question and a carefully chosen work of art teachers can start their students down a path toward deeper learning and other skills now encouraged by the Common Core State Standards. The Visual Thinking Strategies VTS teaching method has been successfully implemented in schools districts and cultural institutions nationwide including bilingual schools in California West Orange Public Schools in New Jersey and the San Francisco Museum of Modern Art. It provides for open ended yet highly structured discussions of visual art and significantly increases students' critical thinking language and literacy skills along the way. Philip Yenawine former education director of New York's Museum of Modern Art and cocreator of the VTS curriculum writes engagingly about his years of experience with elementary school

students in the classroom He reveals how VTS was developed and demonstrates how teachers are using art as well as poems primary documents and other visual artifacts to increase a variety of skills including writing listening and speaking across a range of subjects The book shows how VTS can be easily and effectively integrated into elementary classroom lessons in just ten hours of a school year to create learner centered environments where students at all levels are involved in rich absorbing discussions The Educational Technology Handbook Steven Hackbarth,1996 Grade level 1 2 3 4 5 6 7 8 9 10 11 12 k p e i

Oakhill,2013-04-03 Recognizing the characteristics of children with learning disabilities and deciding how to help them is a problem faced by schools all over the world Although some disorders are fairly easily recognizable e g mental retardation or very specific to single components of performance and quite rare e g developmental dyscalculia schools must consider much larger populations of children with learning difficulties who cannot always be readily classified These children present high level learning difficulties that affect their performance on a variety of school tasks but the underlying problem is often their difficulty in understanding written text In many instances despite good intellectual abilities and a superficial ability to cope with written texts and to use language appropriately some children do not seem to grasp the most important elements or cannot find the pieces of information they are looking for Sometimes these difficulties are not immediately detected by the teacher in the early school years They may be hidden because the most obvious early indicators of reading progress in the teacher s eyes do not involve comprehension of written texts or because the first texts a child encounters are quite simple and reflect only the difficulty level of the oral messages sentences short stories etc with which the child is already familiar However as years go by and texts get more complex comprehension difficulties will become increasingly apparent and increasingly detrimental to effective school learning In turn studying assimilating new information and many other situations requiring text comprehension from problem solving to reasoning with linguistic contents could be affected Problems with decoding dyslexia and language disorders have attracted more interest from researchers than have specific comprehension problems and have occupied more room in specialized journals Normal reading comprehension has also been a favorite with researchers However scarce interest has been paid to subjects who have comprehension difficulties This book is an attempt to remedy this situation In so doing this volume answers the following questions Does a reading comprehension problem exist in schools How important and widespread is the problem Is the problem specific How can a reading comprehension difficulty be defined and identified Does the syndrome have a single pattern or can different subtypes be identified What are the main characteristics associated with a reading comprehension difficulty When can other well identified problems add to our understanding of reading comprehension difficulties Which educational strategies are effective in preventing and

treating reading comprehension difficulties What supplementary information can we get from an international perspective
