Pictures To Live With:

The Photo Ark Joel Sartore, Douglas Chadwick, 2017 Representing National Geographic's Photo Ark a major cross platform initiative and lifelong project by a veteran photographer to make portraits of the world's animals especially those that are endangered this showcase of 600 photos presents a thought provoking argument for saving all the species of our planet

Living Pictures Noa Turel, 2020-09-25 A significant new interpretation of the emergence of Western pictorial realism When Jan van Eyck c 1390-1441 completed the revolutionary Ghent Altarpiece in 1432 it was unprecedented in European visual culture His novel visual strategies including lifelike detail not only helped make painting the defining medium of Western art they also ushered in new ways of seeing the world This highly original book explores Van Eyck's pivotal work as well as panels by Rogier van der Weyden and their followers to understand how viewers came to appreciate a world depicted in two dimensions Through careful examination of primary documents Noa Turel reveals that paintings were consistently described as *au vif* made not from life but into life Animation not representation drove Van Eyck and his contemporaries Turel's interpretation reverses the commonly held belief that these artists were inspired by the era's burgeoning empiricism proposing instead that their living pictures helped create the conditions for empiricism Illustrated with exquisite fifteenth century paintings this volume asserts these works key role in shaping rather than simply mirroring the early modern world

The Revealing Image Joy Schaverien, 2021-11-18 Schaverien painstakingly describes and defines processes which have so far only been intuitively known to art therapists p6 by introducing and elaborating the psychoanalytical concepts of transference and countertransference in relation to the use of visual art objects The authors stated intention in this book is to attempt to bridge the perceived gap between the practice of art therapy and analytical forms of psychotherapy p 229 The epistemological base of this venture includes the fields of philosophy anthropology and aesthetics as well as psychoanalysis Schaverien suggests that analytical art psychotherapy is a way of working analytically with patients who are unsuitable or unready for psychotherapy giving examples of psychotic and borderline patients children and patients in psychiatric settings This is primarily a book about an analytical approach within art therapy which may be of interest in itself The material also raises issues of interest to analysts and psychotherapists whether or not they work with art in the clinical setting The book clarifies areas of similarity between the disciplines and also makes areas of difference apparent For example most analysts would agree that visual art like dream material and other non verbal representations of the inner world can at times articulate and communicate meanings which for one reason or another cannot be verbally articulated at the time and that this can be pertinent to the aim of analysis However I think few analysts would include facilities in their consulting rooms for the kind of art processes described in the book When the analyst is working with materials in this form the book will be extremely helpful in sorting out the complexity of the transference situation and the role of interpretation The book is so strongly grounded in experiences emerging in the presence of actual art processes and

objects that I think it will be of most interest to those who are interested in the specific clinical issues involved in relating to the making and use of actual art objects within the setting Schaverien not only describes the processes involved in detail but also presents technical approaches to the making and handling of art objects within the setting which will inform the capacity of those who are not trained as art therapists to relate to this kind of material in the consulting room *Picture Me Gone*
