Made in California Stephanie Barron, Sheri Bernstein, Ilene Susan Fort, 2000 *Made in California* is divided into five twenty year sections each including a narrative essay discussing the history of that era and highlighting topics relevant to its visual culture BOOK JACKET 1000 and One, 1927 *LifePlace* Robert L. Thayer Jr., 2003-04-22 Robert Thayer brings the concepts and promises of the growing bioregional movement to a wide audience in a book that passionately urges us to discover where we are as an antidote to our rootless stressful modern lives *LifePlace* is a provocative meditation on bioregionalism and what it means to live work eat and play in relation to naturally rather than politically defined areas In it Thayer gives a richly textured portrait of his own home the Putah Cache watershed in California s Sacramento Valley demonstrating how bioregionalism can be practiced in everyday life Written in a lively anecdotal style and expressing a profound love of place this book is a guide to the personal rewards and the social benefits of reinhabiting the natural world

on a local scale In *LifePlace* Thayer shares what he has learned over the course of thirty years about the Sacramento Valley's geography, minerals, flora and fauna, its relation to fire, agriculture and water, and its indigenous peoples, farmers and artists. He shows how the spirit of bioregionalism springs from learning the history of a place from participating in its local economy from living in housing designed in the context of the region. He asks: How can we instill a love of place and knowledge of the local into our education system? How can the economy become more responsive to the ecology of the region? This valuable book is also a window onto current writing on bioregionalism, introducing the ideas of its most notable proponents in accessible and highly engaging prose. At the same time, that it gives an entirely new appreciation of California's Central Valley, *LifePlace* shows how we can move toward a new way of being, thinking and acting in the world that can lead to a sustainable, harmonious and more satisfying future. *Picturing California* Oakland Museum, 1989 **Spirit Into Matter** Julian

Cox, Edmund Teske, 2004 Edmund Teske 1911-1996 was one of the alchemists of twentieth-century American photography. Over a sixty-year period, he created a diverse body of work that explored the expressive and emotional potentials of the medium. His drive to experiment with sophisticated techniques such as solarization and composite printing liberated a younger generation of American photographers. At the same time, his subject matter, sometimes abstract, often homoerotic and always lyrical and poetic, opened up new areas for photographers to explore. *Spirit into Matter* is published to coincide with the first major retrospective of Teske's work to be held at the Getty Museum from June 15 to September 19, 2004. Julian Cox provides an introduction and extensive biocritical essay on Teske that traces his long and varied career from Chicago in the 1930s to Los Angeles, where the photographer took up residence in 1943. Cox investigates Teske's early associations with such influential figures as Frank Lloyd Wright and Paul Strand, and his later associations with iconic figures including filmmaker Kenneth Anger and musicians Ramblin' Jack Elliott and the Doors. The first major study of this fascinating and influential artist, *Spirit into Matter* will be a dynamic source of information for students of photography, collectors, and all those with an interest in the life and culture of Southern California, where Teske worked for more than fifty years.

Picturing Identity Hertha D. Sweet Wong, 2018 *Art in California* Jenni Sorkin, 2021-09-16 An introduction to the rich and diverse art of California, this book highlights its distinctive role in the history of American art from early 20th-century photography to Chicano mural painting, the Fiber Art Movement, and beyond. Shaped by a compelling network of geopolitical influences, including waves of migration and exchange from the Pacific Rim and Mexico, the influx of African Americans immediately after World War II, and global immigration after quotas were lifted in the 1960s, California is a centre of artistic activity whose influence extends far beyond its physical boundaries. Furthermore, California was at the forefront of radical developments in artistic culture, most notably conceptual art and feminism, and its education system continues to nurture and encourage avant-garde creativity. Organized chronologically and thematically, with illustrations throughout, this attractive study stands as an important reassessment of California's contribution to modern and contemporary art in the United States.
