Pidginization and Creolization of Languages: Their Social Contexts

<https://doi.org/10.1515/ijsl-2020-2088>

Abstract: Sociolinguistic debates around the definitions and significance of “pidgin” and “creole” languages were increasing in the 1960s and the SSRC’s Committee on Sociolinguistics played a role in cultivating these discussions. This 1968 report by Dell Hymes summarizes issues raised at a conference convened by the Council at the University of the West Indies, Jamaica, to better understand the historical development, the grammatical and lexical evolutions, and the social uses of pidgin and creole languages. Though he highlights how social science can better inform research on pidginization and creolization, Hymes identifies knowledge gaps, among them the nature of the relationship between these languages and national identity, and more broadly the lack of historical and social scientific knowledge of this topic.

Languages called “pidgins” and “creoles” have been something of a stepchild in scientific research, but their origins and social functions pose in particularly clear form problems of the sort with which the Council’s Committee on Sociolinguistics is concerned. In analyzing historical change and in describing present structure in language, linguists often find it possible to take social factors for granted. Work proceeds as if something that might be called “normal transmission” of speech from one generation to the next could be assumed, or as if the sample of speech provided by one’s informants could be safely assumed to represent a norm identical throughout the community. Whether these assumptions are justified is open to question; what is clear is that even the ordinary work of the linguist cannot proceed without questioning them in the case of “pidgins” and “creoles.” These languages demonstrate dramatically the interdependence of linguistics and social science, and open up new possibilities for the integration of their methods and theories. During the past decade there has been a notable growth of interest and information concerning such languages, whose implications have not yet been widely recognized.

For these reasons an international conference was organized to encourage research on situations of pidginization and creolization, and call attention to its

Mona, Jamaïque, 1971 *Creolization and Pidginization in Contexts of Postcolonial Diversity*, 2018-02-27 This book deals with creolization and pidginization of language culture and identity and makes use of interdisciplinary approaches developed in the study of the latter Creolization and pidginization are conceptualized and investigated as specific social processes in the course of which new common languages socio cultural practices and identifications are developed under distinct social and political conditions and in different historical and local contexts of diversity The contributions show that creolization and pidginization are important strategies to deal with identity and difference in a world in which diversity is closely linked with inequalities that relate to specific group memberships colonial legacies and social norms and values **Atlantic Meets Pacific** Francis Byrne, John A. Pidginization and Creolization Kees Versteegh, C. H. M. Versteegh, 1984 This book is concerned with the notions of pidginization and creolization and the role of these processes of language learning in the history of the Arabic language It is argued that when a new type of Arabic emerged after the Islamic conquests in the 7th century AD the language went through these processes as can be concluded from the sociolinguistic context of the period The radical changes in the language that led to the development of the modern dialects are then seen as the result of pidginization and creolization Data from the dialects are compared with phenomena in pidginized creolized languages and suggestions are given for the application of this framework to the history of other languages

Language Contact in the Early Colonial Pacific Emanuel J. Drechsel, 2014-03-27 This volume presents a historical sociolinguistic description and analysis of Maritime Polynesian Pidgin It offers linguistic and sociohistorical substantiation for a regional Eastern Polynesian based pidgin and challenges conventional Eurocentric assumptions about early colonial contact in the eastern Pacific by arguing that Maritime Polynesian Pidgin preceded the introduction of Pidgin

Creole Identity in Postcolonial Indonesia Jacqueline Knörr, 2014-03 Contributing to identity formation in ethnically and religiously diverse postcolonial societies this book examines the role played by creole identity in Indonesia and in particular its capital Jakarta While on the one hand it facilitates transethnic integration and promotes a specifically postcolonial sense of common nationhood due to its heterogeneous origins creole groups of people are often perceived ambivalently in the wake of colonialism and its demise on the other In this book Jacqueline Knörr analyzes the social historical and political contexts of creoleness both at the grassroots and the State level showing how different sections of society engage with creole identity in order to promote collective identification transcending ethnic and religious boundaries as well as for reasons of self interest and ideological projects

[The Creole Debate](#) John H. McWhorter, 2018-05-17 Creoles have long been the subject of debate in linguistics with many conflicting views both on how they are formed and what their political and linguistic status should be Indeed over the past twenty years some creole specialists have argued that it has been wrong to think of creoles as anything but language blends in the same way that Yiddish is a blend of German and Hebrew and Slavic Here John H McWhorter debunks the most widely accepted idea that creoles are created in the same way as children taking characteristics from both parent languages and its underlying assumption that all historical and biological processes are the same Instead the facts support the original and more

interesting argument that creoles are their own unique entity and are among the world's only genuinely new languages

The Handbook of World Englishes Braj B. Kachru, Yamuna Kachru, Cecil L. Nelson, 2009-02-09 The Handbook of World Englishes is a collection of newly commissioned articles focusing on selected critical dimensions and case studies of the theoretical, ideological, applied and pedagogical issues related to English as it is spoken around the world. Represents the cross-cultural and international contextualization of the English language. Articulates the visions of scholars from major varieties of world Englishes: African, Asian, European, and North and South American. Discusses topics including the sociolinguistic contexts of varieties of English in the inner, outer, and expanding circles of its users; the ranges of functional domains in which these varieties are used; the place of English in language policies and language planning; and debates about English as a cause of language death, murder, and suicide.

The Cambridge Handbook of Sociolinguistics Rajend Mesthrie, 2011-10-06 The most comprehensive overview available, this Handbook is an essential guide to sociolinguistics today. Reflecting the breadth of research in the field, it surveys a range of topics and approaches in the study of language variation and use in society. As well as linguistic perspectives, the handbook includes insights from anthropology, social psychology, the study of discourse and power, conversation analysis, theories of style and styling, language contact, and applied sociolinguistics. Language practices seem to have reached new levels since the communications revolution of the late twentieth century. At the same time, face-to-face communication is still the main force of language identity, even if social and peer networks of the traditional face-to-face nature are facing stiff competition from the Facebook to Facebook sort. The most authoritative guide to the state of the field, this handbook shows that sociolinguistics provides us with the best tools for understanding our unfolding evolution as social beings.

Structure and Variation in Language Contact Ana Deumert, Stephanie Durrleman-Tame, 2006-01-01 This volume presents a careful selection of fifteen articles presented at the SPCL meetings in Atlanta, Boston, and Hawaii in 2003 and 2004. The contributions reflect from various perspectives and using different types of data on the interplay between structure and variation in contact languages both synchronically and diachronically. The contributors consider a wide range of languages including Surinamese creoles, Chinook Jargon, Yiddish, AAVE, Haitian Creole, Afro-Hispanic and Afro-Portuguese varieties, Nigerian Pidgin, Sri Lankan Malay, Papiamentu, and Bahamian Creole English. Hackert: A need to question and test existing claims regarding pidginization: creolization is evident in all contributions, and the authors provide analyses for a variety of grammatical structures: VO ordering and affixation, agglutination, negation, TMAs, plural marking, the copula, and serial verb constructions. The volume provides ample evidence for the observation that pidgin/creole studies is today a mature subfield of linguistics which is making important contributions to general linguistic theory.
