Flynn, W. O'Neil, 2012-12-06 Suzanne Flynn and Wayne O Neil Massachusetts Institute of Technology

I INTRODUCTION The theory of Universal Grammar UG as explicated e g in Chomsky 1986 has led to explosive developments in the study of natural language as well as to significant advances in the study of first language L1 acquisition Most recently the theory of UG has led to important theoretical and empirical advances in the field of adult second language L2 acquisition as well The principle impetus for this development can be traced to the work in linguistics which shifted the study from behavior or the products of behavior to states of the mind brain that enter into behavior Chomsky 1986 3 Grammars within this framework are conceived of as theoretical accounts of the state of the mind brain of the person who knows a particular language Chomsky 1986 3 Research within fields of language acquisition seeks to isolate and specify the properties of the underlying competence necessary for language learning Full development of a theory of UG demands study and understanding of the nature of both the formal properties of language and of the language acquisition process itself However while there is a tradition of debate and dialogue established between theoretical linguistics and L1 acquisition research relatively few connections have been made between linguistic theory and L2 acquisition research Atlantic Meets Pacific Francis Byrne, John A. Pidginization and Creolization Kees Versteegh, C. H. M. Versteegh, 1984 This book is concerned with the notions of pidginization and creolization and the role of these processes of language learning in the history of the Arabic language It is argued that when a new type of Arabic emerged after the Islamic conquests in the 7th century AD the language went through these processes as can be concluded from the sociolinguistic context of the period The radical changes in the language that led to the development of the modern dialects are then seen as the result of pidginization and creolization Data from the dialects are compared with phenomena in pidginized creolized languages and suggestions are given for the application of this framework to the history of other languages

The Structure and Status of Pidgins and Creoles Arthur Kean Spears, Donald Winford, 1997-01-01 Destined to become a landmark work this book is devoted principally to a reassessment of the content categories boundaries and basic assumptions of pidgin and creole studies It includes revised and elaborated papers from meetings of the Society for Pidgin and Creole Linguistics in addition to commissioned papers from leading scholars in the field As a group the papers undertake this reassessment through a reevaluation of pidgin creole terminology and contact language typology Section One a questioning of process and evolution in pidginization creolization and other language contact phenomena Section Two a reinterpretation of the sources and genesis of grammatical aspects of Saramaccan and Atlantic creoles in general Section Three a reconsideration of the status of languages defying received definitions of pidgins and creoles Section Four and analyses of aspects of grammar that shed light on the issue of what a possible creole grammar is Section Five

Creolization and Contact Norval Smith, Tonjes Veenstra, 2001 This volume contains revised and extended versions of a selection of the papers presented at The Amsterdam Workshop on Language Contact and Creolization These studies apply the concept of relexification to creoles as well as other contact languages highlight the relevance of strategies of second language learning for theories of pidgin creole genesis critically discuss the notions levelling koine formation and convergence the relation between types of contact situations and processes of crosslinguistic influence as well as the linguistic consequences of the social structure of the plantation system In addition to discussing English French and Dutch related creoles the papers cover a wide range of contact languages spoken throughout Africa Asia and Europe The breadth and coverage makes this an indispensable title for research in the field of contact linguistics

Pidgins and Creoles Jacques Arends, Pieter Muysken, Norval Smith, 1994-12-20 This introduction to the linguistic study of pidgin and creole languages is clearly designed as an introductory course book It does not demand a high level of previous linguistic knowledge Part I General Aspects and Part II Theories of Genesis constitute the core for presentation and discussion in the classroom while Part III Sketches of Individual Languages such as Eskimo Pidgin Haitian Saramaccan Shaba Swahili Fa d Ambu Papiamentu Sranan Berbice Dutch and Part IV Grammatical Features such as TMA particles and auxiliaries noun phrases reflexives serial verbs fronting can form the basis for further exploration A concluding

chapter draws together the different strands of argumentation and the annotated list provides the background information on several hundred pidgins creoles and mixed languages Diversity rather than unity is taken to be the central theme and for the first time in an introduction to pidgins and creoles the Atlantic creoles receive the attention they deserve Pidgins are not treated as necessarily an intermediate step on the way to creoles but as linguistic entities in their own right with their own characteristics In addition to pidgins mixed languages are treated in a separate chapter Research on pidgin and creole languages during the past decade has yielded an abundance of uncovered material and new insights This introduction written jointly by the creolists of the University of Amsterdam could not have been written without recourse to this new material

Language Contact in the Early Colonial Pacific Emanuel J. Drechsel, 2014-03-27 This volume presents a historical sociolinguistic description and analysis of Maritime Polynesian Pidgin It offers linguistic and sociohistorical substantiation for a regional Eastern Polynesian based pidgin and challenges conventional Eurocentric assumptions about early colonial contact in the eastern Pacific by arguing that Maritime Polynesian Pidgin preceded the introduction of Pidgin English by as much as a century Emanuel J Drechsel not only opens up new methodological avenues for historical sociolinguistic research in Oceania by a combination of philology and ethnohistory but also gives greater recognition to Pacific Islanders in early contact between cultures Students and researchers working on language contact language typology historical linguistics and sociolinguistics will want to read this book It redefines our understanding of how Europeans and Americans interacted with Pacific Islanders in Eastern Polynesia during early encounters and offers an alternative model of language contact

Creolization and Pidginization in Contexts of Postcolonial Diversity, 2018-02-27 This book deals with creolization and pidginization of language culture and identity and makes use of interdisciplinary approaches developed in the study of the latter Creolization and pidginization are conceptualized and investigated as specific social processes in the course of which new common languages socio cultural practices and identifications are developed under distinct social and political conditions and in different historical and local contexts of diversity The contributions show that creolization and pidginization are important strategies to deal with identity and difference in a world in which diversity is closely linked with inequalities that relate to specific group memberships colonial legacies and social norms and values
