A History of the World in 100 Objects Neil MacGregor,2011-10-06 This book takes a dramatically original approach to the history of humanity using objects which previous civilisations have left behind them often accidentally as prisms through which we can explore past worlds and the lives of the men and women who lived in them The book s range is enormous It begins with one of the earliest surviving objects made by human hands a chopping tool from the Olduvai gorge in Africa and ends with an object from the 21st century which represents the world we live in today Neil MacGregor s aim is not simply to describe these remarkable things but to show us their significance how a stone pillar tells us about a great Indian emperor preaching tolerance to his people how Spanish pieces of eight tell us about the beginning of a global currency or how an early Victorian tea set tells us about the impact of empire Each chapter immerses the reader in a past civilisation accompanied by an exceptionally well informed

guide Seen through this lens history is a kaleidoscope shifting interconnected constantly surprising and shaping our world today in ways that most of us have never imagined An intellectual and visual feast it is one of the most engrossing and unusual history books published in years **Pieces of Eight** Charles Johnson,1988 David and his younger brother Mitchell travel back to the early 1700s and fall in with the fierce pirate Blackbeard as he preys on ships off the coast of North America
