The World in a Grain Vince Beiser, 2019-08-06 A finalist for the PEN E O Wilson Literary Science Writing Award The gripping story of the most important overlooked commodity in the world sand and the crucial role it plays in our lives After water and air sand is the natural resource that we consume more than any other even more than oil Every concrete building and paved road on Earth every computer screen and silicon chip is made from sand From Egypt's pyramids to the Hubble telescope from the world's tallest skyscraper to the sidewalk below it from Chartres stained glass windows to your iPhone sand shelters us empowers us engages us and inspires us It's the ingredient that makes possible our cities our science our lives and our future And incredibly we're running out of it *The World in a Grain* is the compelling true story of the hugely important and diminishing natural resource that grows more essential every day and of the people who mine it sell it build with it and sometimes even kill for it It's also a provocative examination of the serious human and environmental costs incurred by our dependence on sand which has received little public attention Not all sand is created equal Some of the easiest sand to get to is the least useful Award winning journalist Vince Beiser delves deep into this world taking readers on a journey across the globe from the United States to remote corners of India China and Dubai to explain why sand is so crucial to modern life Along the way readers encounter world changing innovators island building entrepreneurs desert fighters and murderous sand pirates The result is an entertaining and eye opening work one that is both unexpected and involving rippling with fascinating detail and filled with surprising characters

 These nine stories from 1960 early in Brian Aldiss's long and productive career were originally conceived as a single entity and form a chronicle of the next forty million years They are arranged sequentially beginning with the near future and ending with The Ultimate Millennia hundreds of thousands or even millions of years later One cannot help being struck by the variety of concepts the mastery of style the sureness of the dialogue the depth of characterization the fertility of ideas and the urbanity of the wit here is a major talent at work Science Fiction Writers The Sandman E.T.A.
