**The Invention of the Self** Andrew Spira, 2020-06-25 This book is an examination of personal identity exploring both who we think we are and how we construct the sense of ourselves through art It proposes that the notion of personal identity is a psycho-social construction that has evolved over many centuries While this idea has been widely discussed in recent years Andrew Spira approaches it from a completely new point of view Rather than relying on the thinking subject's attempts to identify itself consciously and verbally it focuses on the traces that the self-sense has unconsciously left in the fabric of its environment in the form of non-verbal cultural conventions Covering a millennium of western European cultural history it amounts to an anthropology of personal identity in the West Following a broadly chronological path Spira traces the self-sense from its emergence from the collectivity of the medieval Church to its consummation in the individualistic concept of artistic genius in the nineteenth century In doing so it aims to bridge a gap that exists between cultural history and philosophy Regarding cultural history especially art history it elicits significances from its material that have been thoroughly overlooked Regarding philosophy it highlights the crucial role that material culture plays in the formation of philosophical ideas It argues that the sense of personal self is as much revealed by cultural conventions and as a cultural convention as it is observable to the mind as an object of philosophical enquiry

From Filippo Lippi to Piero Della Francesca Pinacoteca di Brera, Metropolitan Museum of Art (New York, N.Y.), 2005 In doing so it examines the art of Florence in the 1440s and the work of among others Fra Filippo Lippi Domenico Veneziano Luca della Robbia and Michelozzo **BOOK JACKET**

Visiting the Visitor Ann Davis, Kerstin Smeds, 2016-07-15 The study of the museum visitor has undergone radical transformation Each author here has asked unfamiliar questions and responded with fresh answers Some of these questions involve the visitor's identity what she brings to her museum experience Can we gain entry into this experience Does more technology really increase access to the objects themselves Others probe the very nature of museum going and exhibition making demanding that we reexamine the traditional exhibition to reposition the visitor and her meaning making at the centre The volume provokes imaginative research and encourages new conclusions

**5000 Years of Geometry** Christoph J. Scriba, Peter Schreiber, 2015-04-22 The present volume provides a fascinating overview of

geometrical ideas and perceptions from the earliest cultures to the mathematical and artistic concepts of the 20th century It is the English translation of the 3rd edition of the well received German book 5000 Jahre Geometrie in which geometry is presented as a chain of developments in cultural history and their interaction with architecture the visual arts philosophy science and engineering Geometry originated in the ancient cultures along the Indus and Nile Rivers and in Mesopotamia experiencing its first Golden Age in Ancient Greece Inspired by the Greek mathematics a new germ of geometry blossomed in the Islamic civilizations Through the Oriental influence on Spain this knowledge later spread to Western Europe Here as part of the medieval Quadrivium the understanding of geometry was deepened leading to a revival during the Renaissance Together with parallel achievements in India China Japan and the ancient American cultures the European approaches formed the ideas and branches of geometry we know in the modern age coordinate methods analytical geometry descriptive and projective geometry in the 17th and 18th centuries axiom systems geometry as a theory with multiple structures and geometry in computer sciences in the 19th and 20th centuries Each chapter of the book starts with a table of key historical and cultural dates and ends with a summary of essential contents of geometry in the respective era Compelling examples invite the reader to further explore the problems of geometry in ancient and modern times The book will appeal to mathematicians interested in Geometry and to all readers with an interest in cultural history From letters to the authors for the German language edition I hope it gets a translation as there is no comparable work Prof J Grattan Guinness Middlesex University London Five Thousand Years of Geometry I think it is the most handsome book I have ever seen from Springer and the inclusion of so many color plates really improves its appearance dramatically Prof J W Dauben City University of New York An excellent book in every respect The authors have successfully combined the history of geometry with the general development of culture and history The graphic design is also excellent Prof Z N denik Czech Technical University in Prague

**Mary of Mercy in Medieval and Renaissance Italian Art** Katherine T. Brown, 2017-07-05 Mater Misericordiae Mother of Mercy emerged as one of the most prolific subjects in central Italian art from the late thirteenth through the sixteenth centuries With iconographic origins in Marian cult relics brought from Palestine to Constantinople in the fifth century the amalgam of attributes coalesced in Armenian Cilicia then morphed as it spread to Cyprus An early concept of Mary of Mercy the Virgin standing with outstretched arms and a wide mantle under which kneel or stand devotees entered the Italian peninsula at the ports of Bari and Venice during the Crusades eventually converging in central Italy The mendicant orders adopted the image as an easily recognizable symbol for mercy and aided in its diffusion In this study the author's primary goals are to explore the iconographic origins of the Madonna della Misericordia as a devotional image by identifying and analyzing key attributes to consider circumstances for its eventual overlapping function as a secular symbol used by lay confraternities and to discuss its diaspora throughout the Italian peninsula Western Europe and eastward into Russia and Ukraine With over 100 illustrations the book presents an array of works of art as examples including altarpieces frescoes oil

paintings manuscript illuminations metallurgy glazed terracotta stained glass architectural relief sculpture and processional banners

European Art of the Fifteenth Century Stefano Zuffi, 2005 Influenced by a revival of interest in Greco Roman ideals and sponsored by a newly prosperous merchant class fifteenth century artists produced works of astonishingly innovative content and technique The International Gothic style of painting still popular at the beginning of the century was giving way to the influence of Early Netherlandish Flemish masters such as Jan van Eyck who emphasized narrative and the complex use of light for symbolic meaning Patrons favored paintings in oil and on wooden panels for works ranging from large hinged altarpieces to small increasingly lifelike portraits In the Italian city states of Florence Venice and Mantua artists and architects alike perfected existing techniques and developed new ones The painter Masaccio mastered linear perspective the sculptor Donatello produced anatomically correct but idealized figures such as his bronze nude of David and the brilliant architect and engineer Brunelleschi integrated Gothic and Renaissance elements to build the self supporting dome of the Florence Cathedral This beautifully illustrated guide analyzes the most important people places and concepts of this early Renaissance period whose explosion of creativity was to spread throughout Europe in the sixteenth century

**Astrolabes and Angels, Epigrams and Enigmas** David A. King,2007 On the astrolabe presented by the young German astronomer Regiomontanus to his ageing patron Cardinal Bessarion there is a Latin epigram and the image of an angel The former is a geometrically arranged acrostic with eight hidden vertical axes Of these the two principal ones correspond precisely to the two principal axes of the enigmatic painting The Flagellation of Christ by Piero della Francesca In this are five figures in a flagellation scene on the left and three modern figures on the right including a bearded Greek and an angelic young man in cardinal red Over 40 interpretations of the three moderns have been proposed over the past 150 years In this book David King shows how clusters of letters across the epigram reveal double or multiple identities for each and every one of the eight persons in the painting The only new person in the drama is Regiomontanus whose epigram provided the inspiration for the painting His image embodies three talented young men close to Bessarion who had recently died and also symbolizes the cardinal's hope for the future
