**Pietro Belluschi** Meredith L. Clausen, 1994 Meredith Clausen reveals the enormous power that Belluschi wielded as an arbiter of taste and decision maker in the 1950s and 1960s his role in shaping the policy of the State Department in its overseas building program and his role in securing major commissions for favored architects such as I M Pei Equally important is Clausen's discussion of Belluschi's role in the development of regionalism in the Pacific Northwest and its impact on the definition of modernism as it was emerging in the United States

*Alloys* Marin R. Sullivan, 2022-03-22 A new look at the interrelationship of architecture and sculpture during one of the richest periods of American modern design *Alloys* looks at a unique period of synergy and exchange in the postwar United States when sculpture profoundly shaped architecture and vice versa Leading architects such as Gordon Bunshaft and Eero Saarinen turned to sculptors including Harry Bertoia Alexander Calder Richard Lippold and Isamu Noguchi to produce site determined large scale sculptures tailored for their buildings highly visible and well traversed threshold spaces The parameters of these spaces atriums lobbies plazas and entryways led to various designs like sculptural walls ceilings and screens that not only embraced new industrial materials and processes but also demonstrated art's ability to merge with lived architectural spaces Marin Sullivan argues that these sculptural commissions represent an alternate history of midcentury American art Rather than singular masterworks by lone geniuses some of the era's most notable spaces Philip Johnson's Four Seasons Restaurant in Mies van der Rohe's Seagram Building Max Abramovitz's Philharmonic Hall at Lincoln Center and Pietro Belluschi and Walter Gropius's Pan Am Building would be diminished without the collaborative efforts of architects and artists At the same

time the artistic creations within these spaces could not exist anywhere else Sullivan shows that the principle of synergy provides an ideal framework to assess this pronounced relationship between sculpture and architecture She also explores the afterlives of these postwar commissions in the decades since their construction A fresh consideration of sculpture's relationship to architectural design and functionality following World War II Alloys highlights the affinities between the two fields and the ways their connections remain with us today

**An Architecture of Immanence** Mark A. **Minoru Yamasaki** Dale Allen Gyure, 2017-11-28 The first book to reevaluate the evocative and polarizing work of one of midcentury America's most significant architects Born to Japanese immigrant parents in Seattle Minoru Yamasaki 1912 1986 became one of the towering figures of midcentury architecture even appearing on the cover of Time magazine in 1963 His self-proclaimed humanist designs merged the modern materials and functional considerations of postwar American architecture with traditional elements such as arches and colonnades Yamasaki's celebrated and iconic projects of the 1950s and 60s including the Lambert St Louis Airport and the U S Science Pavilion in Seattle garnered popular acclaim Despite this initial success Yamasaki's reputation began to decline in the 1970s with the mixed critical reception of the World Trade Center in New York one of the most publicized projects in the world at the time and the spectacular failure of St Louis's Pruitt Igoe Apartments which came to symbolize the flaws of midcentury urban renewal policy And as architecture moved in a more critical direction influenced by postmodern theory Yamasaki seemed increasingly old-fashioned In the first book to examine Yamasaki's life and career Dale Allen Gyure draws on a wealth of previously unpublished archival material and nearly 200 images to contextualize his work against the framework of midcentury modernism and explore his initial successes his personal struggles including with racism and the tension his work ultimately found in the divide between popular and critical taste

**Five Houses, Ten Details** Edward R. Ford, 2012-04-17 Edward Ford's forty years of practicing and teaching architecture have focused on one area the architectural detail Yet despite two hugely influential books The Details of Modern Architecture volumes 1 and 2 numerous articles and lectures given from Vancouver to Vienna there are two questions Ford has remarkably never answered What is a detail and more importantly What is a good detail Ford is an architect as well as a writer so it is not surprising that rather than answering these questions in a third book he spent six years on the design and construction of a house Building it was not an exercise in the application of ideas about detail it was rather a mechanism for answering those two simple questions
