aviation pioneer Harold Pitcairn started the first carrier air mail route from New York to Atlanta under his company Pitcairn Aviation. Clement Keys of National Air Transport bought the company in 1929, changed the name to Eastern Air Transport, and began passenger service the next year on daily round trips between New York and Richmond. The growing airline was purchased by General Motors and became Eastern Air Lines in 1934. World War I flying ace Edward V. Rickenbacker purchased the airline four years later and led it to become by the 1950s the most profitable airline in the United States. Former astronaut Frank Borman became president of Eastern in 1975 and tried to manage the airline through deregulation, labor union conflict, and heavy debt, ending with the sale of Eastern to Frank Lorenzo and Texas Air in 1986. The airline entered bankruptcy in March 1989 and ended service in less than two years. This detailed history follows Eastern from start to finish, studying such corporate decision making as aircraft purchases and route expansions, as well as the personalities that shaped the airline throughout its history. **Flying Magazine**, 1954-02 **FAA Aviation News**, 1969 **Balloons to Jets**

Howard L. Scamehorn, 2000 **Balloons to Jets: A Century of Aviation in Illinois 1855-1955**, written by historian Howard L. Scamehorn. It was originally published in 1957 by the Illinois State Historical Society and distributed only to the society's membership and to select libraries in the state. Scamehorn offers a wealth of information not only on one hundred years of aviation in Illinois but also on events leading up to the Wright Brothers' initial flight in 1903. Scamehorn's history of aviation in Illinois covers such topics as amateur pilots, aviation contests, and the development of airmail, military aeronautics, commercial air transport, the expansion of airports, flyers, and flying achievements, and state and federal regulation of aeronautics. But **Balloons to Jets** is not just a history of aviation in one state; Scamehorn also traces national and international aviation progress from the free balloon to the dirigible. He then describes aeronautical activities and experiments by such people as Octave Chanute, Glenn Curtiss, Thomas Scott Baldwin, Otto Lilienthal, Samuel Pierpont Langley, and others that lent support to the Wrights' flight at Kitty Hawk. Of interest to both armchair aviation enthusiasts and professionals, Scamehorn's study illustrates the evolution of commercial aviation from its origins with the military and the itinerant flyer to Charles Lindbergh's successful transatlantic trip in 1927 and the subsequent explosion in public interest in flight. **Balloons to Jets** is lavishly illustrated with eighty-six black and white historic photographs of early aviators and a range of flying craft, including hot air balloons, dirigibles, gliders, biplanes, monoplanes, bombers, and early luxury transports. This reprint features a new foreword by Gene Abney, the former director of the Illinois Department of Aeronautics. **The World's Work**, 1921
