**Hacking Chinese** Olle Linge, 2016-03-26 Learning Chinese can be frustrating and difficult partly because it's very different from European languages Following a teacher textbook or language course is not enough They show you the characters words and grammar you need to become proficient in Chinese but they don't teach you how to learn them Regardless of what program you're in if any you need to take responsibility for your own learning If you don't you will miss many important things that aren't included in the course you're taking If you study on your own you need to be even more aware of what you need to do what you're doing at the moment and the difference between them Here are some of the questions I have asked and have since been asked many times by students How do I learn characters efficiently How do I get the most out of my course or teacher Which are the best learning tools and resources How can I become fluent in Mandarin How can I improve my pronunciation How do I learn successfully on my own How can I motivate myself to study more How can I fit learning Chinese into a busy schedule The answers I've found to these questions and many others form the core of this book It took eight years of learning researching teaching and writing to figure these things out Not everybody has the time to do that I can't go back in time and help myself learn in a better way but I can help you This book is meant for normal students and independent language learners alike While it covers all major areas of learning you won't learn Chinese just by reading this book It's like when someone on TV teaches you how to cook you won't get to eat the delicious dish just by watching the program you have to do the cooking yourself That's true for this book as well When you apply what you learn it will boost your learning making every hour you spend count for more but you still have to do the learning yourself This is what a few readers have said about the book The book had me nodding at a heap of things I'd learnt the hard way wishing I knew them when I started as well as highlighting areas that I'm currently missing in my study Geoff van der Meer VP engineering This publication is like a bible for anyone serious about Chinese proficiency It's easy for anyone to read and written with scientific precision Zachary Danz foreign teacher children's theatre artist About me I started learning Chinese when I was 23 that's more than eight years ago now and have since studied in many different situations including serious immersion programs abroad high intensity programs in Sweden online courses as well as on the side while working or studying other things I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language taught entirely in Chinese mostly for native speakers the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University All these parts have contributed to my website Hacking

 helped thousands of learners memorize Japanese kanji has been adapted to help students with Chinese characters  
 Remembering Simplified Hanzi covers the writing and meaning of the 1 000 most commonly used characters in the  
 traditional Chinese writing system plus another 500 that are best learned at an early stage Of critical importance to the  
 approach found in these pages is the systematic arranging of characters in an order best suited to memory In the Chinese  
 writing system strokes and simple components are nested within relatively simple characters which can in turn serve as parts  
 of more complicated characters and so on Taking advantage of this allows a logical ordering making it possible for students  
 to approach most new characters with prior knowledge that can greatly facilitate the learning process BOOK JACKET □□□
