whereby information that is given or new is distributed and presented within a sentence in particular ways that convey its relevance Although it has been widely described as the speaker s linguistic choices based on the hearer s perspective it has received less attention as the speaker s manipulations of the hearer s cognitive states This timely study redresses that balance by analysing several morphosyntactic phenomena in Japanese drawing on a wide range of authentic language examples Taking a functionalist perspective it brings together studies of grammar and discourse which are often described separately and deploys the combined grammar discourse approach in Role and Reference Grammar the structural functionalist theory in which syntax semantics and pragmatics are equally central to our understanding of language It also offers an analysis of second language L2 learners Japanese discourse and demonstrates the relevance of that analysis to issues outside of traditional second language research **Pingu and the New Arrival** ,1996 **Pingu the Star** Sibylle
