Ralph Cohen,Michael S. Roth,1995 Recent trends in the humanities and social sciences have forced on academia what many might call a crisis of history Conventional assumptions about coherence and meaning in history are being challenged by questions concerning the relevance of history and attempts to refigure its content and mode of representation The publication of *History and* appears at a critical moment in our efforts to understand the importance of history as it relates to a wide range of scholarly disciplines *History and* brings together some of its most thoughtful scholars to better understand not only how our disciplines are connected to professional historiography but how our attempts to understand cultures are connected to our pasts *The Psychology Industry Under a Microscope!* David B. Stein,2012 *The Psychology Industry Under a Microscope* explores why psychology treatment efficacy rates are so poor why psychological testing is unreliable and why diagnosis is uncertain He also explores the weaknesses inherent in 115 APA accredited doctoral programs and what changes may help improve the effectiveness of the psychology clinician He introduces a cognitive behavioral diagnostic system that is far more cohesive and sensible than the piecemeal and confusing system currently in place This book introduces an easy to understand and innovative visual model that integrates all of clinical psychology and far surpasses any previous attempts at developing models The author also challenges the recent resurgence of the disease model for diagnosis as well as the politics and economics that lie behind its current popularity The reader may feel challenged by this book but will find it difficult to refute its content This thought provoking book is essential for any clinician or teacher **Black & White** Steven Guarnaccia,Susan Hochbaum,2002-03 This gorgeous gift book collects amazing images and examples from mother nature and man made culture from penguins on ice floes to nuns on ice skates Includes hundreds of photos clever commentary and a chic design **The Search for Certainty** W.W. Spradlin,P.B. Porterfield,2012-12-06 Who are we What are we How do we fit into the world Or into the universe These and other questions pertaining to ourselves and our environment are as compelling to us today as they were to our primitive ancestors Throughout our history we have developed paradigms of thought that have attempted to answer these questions each conceptual framework being particularly relevant to its age We are in the twentieth century witnessing a complete reorganization of our thinking We are now with the aid of technology able to bring together both ancient and new patterns of thought and to observe the emergence of a kaleidoscopic world view that is uniting the once dissonant theories of philosophy religion and science This book sketches an historical picture of three world views that have shaped our ideas about ourselves These conceptual formats that have so influenced us are not mutually exclusive and are present in all of us simultaneously although to varying degrees depending upon our individual biases An Illustrated History of Brain Function Edwin Clarke,Kenneth Dewhurst,Michael Jeffrey Aminoff,1996
