

Early Production-Line Cars

By the end of the first decade of the 20th century it had become clear that the future of the automobile lay not only in mass production, but also in standardization of parts and components. As the demand for more and more reliable cars grew, manufacturers began to develop a system of interchangeable parts that would allow them to produce cars in large quantities. This was the beginning of the modern production line, and it was this system that made the automobile a truly mass-produced vehicle.

Pictorial History Of The Automobile:

A Pictorial History of the Automobile Philip Van Doren Stern, 1953 **Dirt Track Auto Racing, 1919-1941** Don Radbruch, 2004-02-06 Prior to World War I auto racing featured expensive machines and teams financed by auto factories. The teams toured the country and most of the races were held in large cities so the vast majority of Americans never saw a race. All this changed after World War I though and in the 1920s and 1930s there were approximately 1 000 dirt tracks in the United States and Canada. The dirt tracks offered small time racing, little prize money and minimal publicity but people loved it. This pictorial history documents dirt track racing with what are today called sprint cars around the United States from 1919 to 1941. Information on dirt track racing in Canada during this time is also provided. Regionally divided chapters detail the drivers, tracks and specific races of each area of the country. Some of the drivers went on to win fame and fortune while others faded into obscurity. Tracks included well known facilities as well as out of the way sites few people had ever heard of. The cars ranged from state of the art machines to the more common home built specials based on Model T or Model A Ford parts. Taken together the drivers, tracks and races of this era were instrumental in making auto racing the popular sport it is today.

Pictorial History of the Automobile, 1987 **A Pictorial History of the Automobile** Peter Roberts, 1977 Text and more than 1 000 photographs describe the history and development of automobiles from 1769 to the present.

The Cars That Henry Ford Built Beverly Rae Kimes, 2005-08-21 At the time in 1978 when *The Cars That Henry Ford Built* was first published, sending a copy for Henry Ford II to review seemed a vain request. *Automobile Quarterly* founding editor and publisher L Scott Bailey was told that Mr Ford never comments on a book written about Ford. Two weeks later came an unexpected exhortation from Henry Ford II: "My grandfather would have loved this book." Ford then specially ordered 20 copies bound in white leather, needed in two weeks. The rush order was necessitated by an upcoming trip to Japan. As is culturally customary to offer a gift that honors one's ancestors, Henry Ford II specifically chose *The Cars That Henry Ford Built* to give to his Japanese hosts. Such high level praise is derived from the book's fresh approach to the subject of Henry Ford both in its study of the man and his cars as well as the exceptional pictorial presentation. Presented for the first time in full color, there is every model Henry Ford produced from the Quadricycle he put together as a young man in 1896 to the famous V8 Ford on the production lines four and a half decades later during his failing years. Probably no other individual in automobile history more accurately mirrored in his cars his view of himself and of America as he saw it. Join award winning historian and author Beverly Rae Kimes as she presents lively historical text that captures Henry growing and aging as his cars grew and aged, each lock stepped together through history. Over 100 full color photographs further bring the man and his creations to life.
