Germany Neil MacGregor, 2014-11-13 From Neil MacGregor the author of *A History of the World in 100 Objects* this is a view of Germany like no other Today as the dominant economic force in Europe Germany looms as large as ever over world affairs But how much do we really understand about it and how do its people understand themselves In this enthralling new book Neil MacGregor guides us through the complex history culture and identity of this most mercurial of countries by telling the stories behind 30 objects in his uniquely magical way Beginning with the fifteenth century invention of the Gutenberg press MacGregor ventures beyond the usual sticking point of the Second World War to get to the heart of a nation that has given us Luther and Hitler the Beetle and Brecht and remade our world again and again This is a view of Germany like no other Neil MacGregor has been Director of the British Museum since August 2002 He was Director of the National Gallery in London from 1987 to 2002 His celebrated books include *A History of the World in 100 Objects* now translated into more than a dozen languages and one of the top selling titles ever published by Penguin Press and Shakespeare's *Restless World*

Stranger in My Own Country Yascha Mounk, 2014-01-07 A moving and unsettling exploration of a young man's formative years in a country still struggling with its past As a Jew in postwar Germany Yascha

Mounk felt like a foreigner in his own country When he mentioned that he is Jewish some made anti Semitic jokes or talked about the superiority of the Aryan race Others sincerely hoping to atone for the country s past fawned over him with a forced friendliness he found just as alienating Vivid and fascinating Stranger in My Own Country traces the contours of Jewish life in a country still struggling with the legacy of the Third Reich and portrays those who inevitably continue to live in its shadow Marshaling an extraordinary range of material into a lively narrative Mounk surveys his countrymen s responses to the Jewish question Examining history the story of his family and his own childhood he shows that anti-Semitism and far right extremism have long coexisted with self-conscious philo-Semitism in postwar Germany But of late a new kind of resentment against Jews has come out in the open Unnoticed by much of the outside world the desire for a finish line that would spell a definitive end to the country s obsession with the past is feeding an emphasis on German victimhood Mounk shows how from the government s pursuit of a less apologetic foreign policy to the way the country s idea of the Volk makes life difficult for its immigrant communities a troubled nationalism is shaping Germany s future

The euro crisis is tearing Europe apart But the heart of the matter is that as the crisis unfolds the basic rules of European democracy are being subverted or turned into their opposite bypassing parliaments governments and EU institutions Multilateralism is turning into unilateralism equality into hegemony sovereignty into the dependency and recognition into disrespect for the dignity of other nations Even France which long dominated European integration must submit to Berlin s strictures now that it must fear for its international credit rating How did this happen The anticipation of the European catastrophe has already fundamentally changed the European landscape of power It is giving birth to a political monster a

German Europe Germany did not seek this leadership position rather it is a perfect illustration of the law of unintended consequences The invention and implementation of the euro was the price demanded by France in order to pin Germany down to a European Monetary Union in the context of German unification It was a quid pro quo for binding a united Germany into a more integrated Europe in which France would continue to play the leading role But the precise opposite has happened Economically the euro turned out to be very good for Germany and with the euro crisis Chancellor Angela Merkel became the informal Queen of Europe The new grammar of power reflects the difference between creditor and debtor countries it is not a military but an economic logic Its ideological foundation is German euro nationalism that is an extended European version of the Deutschmark nationalism that underpinned German identity after the Second World War In this way the German model of stability is being surreptitiously elevated into the guiding idea for Europe The Europe we have now will not be able to survive in the risk laden storms of the globalized world The EU has to be more than a grim marriage sustained by the fear of the chaos that would be caused by its breakdown It has to be built on something more positive a vision of rebuilding Europe bottom up creating a Europe of the citizen There is no better way to reinvigorate Europe than through the coming together of ordinary Europeans acting on their own behalf
