China—Art—Modernity David Clarke, 2019-01-22. *China Art Modernity* provides a critical introduction to modern and contemporary Chinese art as a whole. It illuminates what is distinctive and significant about the rich range of art created during the tumultuous period of Chinese history from the end of Imperial rule to the present day. The story of Chinese art in the twentieth and twenty-first centuries is shown to be deeply intertwined with that of the country's broader socio-political development, with art serving both as a tool for the creation of a new national culture and as a means for critiquing the forms that culture has taken. The book's approach is inclusive. In addition to treating art within the Chinese Mainland itself during the Republican and Communist eras, for instance, it also looks at the art of colonial Hong Kong, Taiwan and the Chinese diaspora. Similarly, it gives equal prominence to artists employing tools and idioms of indigenous Chinese origin and those who engage with international styles and contemporary media. In this way, it writes China into the global story of modern art as a whole at a moment in intellectual history when Western-centred stories of modern and contemporary culture are finally being recognized as parochial and inadequate. Assuming no previous background knowledge of Chinese history and culture, this concise yet comprehensive and richly illustrated book will appeal to those who already have an established interest in modern Chinese art and those for whom this is a novel topic. It will be of particular value to students of Chinese art or

modern art in general but it is also for those in the wider reading public with a curiosity about modern China At a time when that country has become a major actor on the world stage in all sorts of ways accessible sources of information concerning its modern visual culture are nevertheless surprisingly scarce As a consequence a fully nuanced picture of China's place in the modern world remains elusive China Art Modernity is a timely remedy for that situation Here is a book that offers a comprehensive account of the dizzying transformations of Chinese art and society in the twentieth and twenty first centuries Breaking free of conventional dichotomies between traditional and modern Chinese and Western that have hobbled earlier studies Clarke's highly original book is exactly what I would assign my own students Anyone eager to understand developments in China within the global history of modern art should read this book Robert E Harrist Jr Columbia University

Clarke's book presents a critically astute mapping of the arts of modern and contemporary China It highlights the significance of urban and industrial contexts migration diasporas and the margins of the mainland while imaginatively seeking to inscribe its subject into the broader story of modern art A timely and reliable intervention and indispensable for the student and non specialist reader Shane McCausland SOAS University of London [The Chinese Space Programme in the Public Conversation about Space](#) Andrew Thomas, 2020-08-01 This study is the product of a long view of space exploration and the conversations about space in China It locates the multiple conversations about space exploration and utilisation as they are in the Peoples Republic of China PRC within other conversations about space culture in the world China is viewed by Western researchers through many lenses which are examined here critically In previous studies writers explain away China's space programme with the easy answers of a Space Race and a China Threat in which the space programme is seen as merely an example of global competition or threat but this thesis challenges those barriers to Western understanding of the Chinese public conversation of space culture In this study critical theory and an underlying epistemology within a post Enlightenment cultural frame are applied to official archival and ephemeral texts and images The manner of the critical application is distinguished from derivative techniques operationalised as Open Source Intelligence The concept of Place and within that Foucault's linguistic concept of Heterotopia is significant both in understanding the Chinese overseas space bases on Earth and the temporal and spatial dislocations experienced in space missions In acknowledging the interpretative approach an empirical study a Q sort has been carried out which demonstrates that the key factor in the Chinese conversation is Science within the context of modernisation tempered by Chinese cultural affirmation and international co operation The thesis concludes by providing general principles in future work for successful research into the popular culture of space exploration

Chinese Film Jason McGrath, 2023-01-31 A tour de force chronicling the development of realism in Chinese cinema The history of Chinese cinema is as long and complicated as the tumultuous history of China itself Be it the silent the Communist or the contemporary each Chinese cinematic era has necessitated its own form in conversation with broader trends in politics and culture In Chinese Film Jason McGrath tells this fascinating

story by tracing the varied claims to cinematic realism made by Chinese filmmakers officials critics and scholars
Understanding realism as a historical dynamic that is both enabled and mitigated by aesthetic conventions of the day he
analyzes it across six different types of claims ontological perceptual fictional social prescriptive and apophatic Through this
method McGrath makes major claims not just about Chinese cinema but also about realism as an aesthetic form that
negotiates between cultural conventions and the ever evolving real He comes to envision it as more than just a cinematic
question showing how the struggle for realism is central to the Chinese struggle for modernity itself
