Gilman, 1995 A study of visual sources from 19th century textbook illustrations to recent government AIDS posters which finds that the history of our perception of the beautiful body is charged with anxieties about contagion and ugliness It is also entangled with political implications brought about by our interpretation of race as a medical category says Gilman liberal arts and human biology U of Chicago A history both of medicine and of the aestheticization of the body Many bandw illustrations Originally published in Great Britain by Reaktion Books as *Health and Illness Images of Difference* Annotation copyright by Book News Inc Portland OR **Health and Illness** Sander L. Gilman, 2013-06-01 This timely study demonstrates how images of beauty and ugliness have constructed a visual history that records the artificial boundaries dividing healthy bodies from those that are ill Gilman tells an excellent tale Jewish Chronicle

Works of Illness Alan Radley, 2009 This is an investigation into representations of illness combining issues of sociology ethics and aesthetics **Imagining Illness** David Serlin, 2010 Analyzing the visual culture of public health from the nineteenth century to the present *Cinematically Transmitted Disease* Barbara Hales, 2024-04-01 Propaganda played an essential role in influencing the attitudes and policies of German National Socialism on racial purity and euthanasia but little has been said on the impact of medical hygiene films *Cinematically Transmitted Disease* explores these films for the first time from their inception during the Weimar era and throughout the years to come In this innovative volume author Barbara Hales demonstrates how medical films as well as feature films were circulated among the German people to embed and enforce notions of scientific legitimacy for racial superiority and genetically spread incurable diseases creating and maintaining an instrumental fear of degradation in the German national population **Metaphors of Mental Illness in Graphic**

Medicine Sweetha Saji, Sathyaraj Venkatesan, 2021-10-21 This book investigates how graphic medicine enables sufferers of mental illness to visualise the intricacies of their internal mindscape through visual metaphors and reclaim their voice amidst stereotyped and prejudiced assumptions of mental illness as a disease of deviance and violence In this context by using Lakoff and Johnson's conceptual metaphor theory CMT this study uncovers the broad spectrum of the mentally ill's experiences a relatively undertheorised area in medical humanities The aim is to demonstrate that mentally ill people are often represented as either grotesquely exaggerated or overly romanticised across diverse media and biomedical discourses Further they have been disparaged as emotionally drained and unreasonable individuals incapable of active social engagements and against the healthy sane society The study also aims to unsettle the sanity insanity binary and its related patterns of fixed categories of normal abnormal which depersonalise the mentally ill by critically analysing seven graphic narratives on mental illness **Picturing Personhood** Joseph Dumit, 2021-09-14 By showing us the human brain at work PET positron emission tomography scans are subtly and sometimes not so subtly transforming how we think about our minds *Picturing Personhood* follows this remarkable and expensive technology from the laboratory into the world and back It

examines how PET scans are created and how they are being called on to answer myriad questions with far reaching implications Is depression an observable brain disease Are criminals insane Do men and women think differently Is rationality a function of the brain Based on interviews media analysis and participant observation at research labs and conferences Joseph Dumit analyzes how assumptions designed into and read out of the experimental process reinforce specific notions about human nature Such assumptions can enter the process at any turn from selecting subjects and mathematical models to deciding which images to publish and how to color them Once they leave the laboratory PET scans shape social debates influence courtroom outcomes and have positive and negative consequences for people suffering mental illness Dumit follows this complex story demonstrating how brain scans as scientific objects contribute to our increasing social dependence on scientific authority The first book to examine the cultural ramifications of brain imaging technology *Picturing Personhood* is an unprecedented study that will influence both cultural studies and the growing field of science and technology studies

Mapping AIDS Lukas Engelmann, 2018-11-08 In this innovative study Lukas Engelmann examines visual traditions in modern medical history through debates about the causes impact and spread of AIDS Utilising medical AIDS atlases produced between 1986 and 2008 for a global audience Engelmann argues that these visual textbooks played a significant part in the establishment of AIDS as a medical phenomenon However the visualisations risked obscuring the social cultural and political complexity of AIDS history Photographs of patients were among the earliest responses to the mysterious syndrome cropped and framed to deliver a visible characterisation of AIDS to a medical audience Maps then offered an abstracted image of the regions invaded by the epidemic while the icon of the virus aspired to capture the essence of AIDS The epidemic s history is retold through clinical photographs epidemiological maps and icons of HIV asking how this devastating epidemic has come to be seen as a controllable chronic condition

The Medicine of Art Elizabeth L. Lee, 2021-12-30 In 1901 the sculptor Augustus Saint Gaudens proclaimed in a letter to Will Low Health is the thing Though recently diagnosed with intestinal cancer Saint Gaudens was revitalized by recreational sports having realized midcareer there is something else in life besides the four walls of an ill ventilated studio The Medicine of Art puts such moments center stage in order to consider the role of health and illness in the way art was produced and consumed Not merely beautiful or entertaining objects works by Gilded Age artists such as John Singer Sargent Abbott Thayer and Augustus Saint Gaudens are shown to function as balm for the ill providing relief from physical suffering and pain Art did so by blunting the edges of contagious disease through a process of visual translation In painting for instance hacking coughs bloody sputum and bodily enervation were recast as signs of

spiritual elevation and refinement for the tuberculous who were shown with a pale chalky pallor that signalled rarefied beauty rather than an alarming indication of death. Works of art thus redirected the experience of illness in an era prior to the life saving discoveries that would soon become hallmarks of modern medical science to offer an alternate therapy. The first study to address the place of organic disease cancer tuberculosis syphilis in the life and work of Gilded Age artists this book looks at how well known works of art were marked by disease and argues that art itself functioned in medicinal terms for artists and viewers in the late 19th century

Transacting Sites of the Liminal Bodily Spaces Catalina Florina Florescu, 2011-01-18 This book focuses on liminal bodies and their delicate transaction with themselves and other people's bodies. More specifically it explores the spatiality and discourses of the body dying the body opened in surgery or through MRIs CATs and sometimes in autopsies the body preserved through computerized images such as those created by the Visual Human Project the metonymic body that continues to live in another body through organ replacement and the bodily parts cast in silver and then abandoned in a museum. This study also analyzes the discourses of the contemporary body commissioned by the vast industry of mass media. This type of body has started to direct itself toward frugal almost furtive pleasures consequently unlike those seriously affected by illnesses a body constantly guarded by fear eventually runs on empty becomes a corpse and thus moves toward different types of minimal and liminal topology. The primary works examined include memoirs Marjorie Williams's *Hit by Lightning* A Cancer Memoir Arthur W. Frank's *At the Will of the Body* Reflections on Illness Audre Lorde's *The Cancer Journals* films Alejandro Amenábar's *The Sea Inside* Akira Kurosawa's *Ikiru* Pedro Almodóvar's *All about My Mother* stories Marisa Silver's *Night Train to Frankfurt* visual artworks as accomplished by Jo Spence David Wojnarowicz Félix Gonzales Torres and Natalie Horne and plays Bryony Lavery's *Last Easter* Paula Vogel's *Baltimore Waltz* William Hoffman's *As Is* which are read comparatively namely as works positioned at the intersection between literature visual art and social diaries. This book has become part of the collections of the world's leading universities Harvard Princeton Columbia the Library of Congress and more

Bodies Politic Roy Porter, 2021-03-08 In this historical tour de force Roy Porter takes a critical look at representations of the body in health disease and death in Britain from the mid-seventeenth to the twentieth century. Porter argues that great symbolic weight was attached to contrasting conceptions of the healthy and diseased body and that such ideas were mapped onto antithetical notions of the good and the bad the beautiful and the ugly. With these images in mind he explores aspects of being ill alongside the practice of medicine paying special attention to self-presentations by physicians surgeons and quacks and to changes in practitioners' public identities over time. Porter also examines the wider symbolic meanings of disease and doctoring and the body politic. Porter's book is packed with outrageous and amusing anecdotes portraying diseased bodies and medical practitioners alike

Artificial Parts, Practical Lives Katherine Ott, David Serlin, Stephen Mihm, 2002 From the wooden teeth of George Washington to the Bly prosthesis popular in the 1860s and boasting easy uniform motions of the limb to today's lifelike

approximations prosthetic devices reveal the extent to which the evolution and design of technologies of the body are intertwined with both the practical and subjective needs of human beings The peculiar history of prosthetic devices sheds light on the relationship between technological change and the civilizing process of modernity and analyzes the concrete materials of prosthetics which carry with them ideologies of body ideals body politics and culture Simultaneously critiquing historicizing and theorizing prosthetics *Artificial Parts Practical Lives* lays out a balanced and complex picture of its subject neither vilifying nor celebrating the merger of flesh and machine
