Pieces of Earth Ross Raisin,2018-07 **Letters From The Earth** Mark Twain,2017-04-04 The Creator sat upon the throne thinking Behind him stretched the illimitable continent of heaven steeped in a glory of light and color before him rose the black night of Space like a wall His mighty bulk towered rugged and mountain like into the zenith and His divine head blazed there like a distant sun At His feet stood three colossal figures diminished to extinction almost by contrast archangels their heads level with His ankle bone When the Creator had finished thinking He said I have thought Behold He lifted His hand and from it burst a fountain spray of fire a million stupendous suns which clove the blackness and soared away and away and away diminishing in magnitude and intensity as they pierced the far frontiers of Space until at last they were but as diamond nailheads sparkling under the domed vast roof of the universe At the end of an hour the Grand Council was dismissed They left the Presence impressed and thoughtful and retired to a private place where they might talk with freedom None of the three seemed to want to begin though all wanted somebody to do it Craving Earth Sera L. Young,2011-02-21 Humans have eaten earth on purpose for more than 2 300 years They also crave starch ice chalk and other unorthodox items of food Some even claim they are addicted and go crazy without these items but why Sifting through extensive historical ethnographic and biomedical findings Sera L Young creates a portrait of pica or nonfood cravings from humans earliest ingestions to current trends and practices In engaging detail she describes the substances most frequently consumed and the many methods including the Internet used to obtain them She reveals how pica is remarkably prevalent it occurs in nearly every human culture and throughout the animal kingdom identifies its most avid partakers pregnant women and young children and describes the potentially healthful and harmful effects She evaluates the many hypotheses about the causes of pica from the fantastical to the scientific including hunger nutritional deficiencies and protective capacities Never has a book examined pica so thoroughly or accessibly merging absorbing history with intimate case studies to illuminate an enigmatic behavior deeply entwined with human biology and culture Saving Earth Olugbemisola Rhuday-Perkovich,2022-04-05 A timely and inspiring nonfiction guide for middle grade readers about the history of our fight against climate change and how young people today are rising to action Inspired by Nathaniel Rich's Losing Earth A Recent History the acclaimed book that grew out of an August 2018 issue of the New York Times Magazine solely dedicated to it Saving Earth tells the human story of the climate change conversation from the recent past into the present day It wrestles with the long shadow of our failures

what might be ahead for today's generation and crucial questions of how we understand the world we live in and how we can work together to change the outlook for the better. Written by acclaimed author Olugbemisola Rhuday Perkovich and enlivened with illustrations from Tim Foley and filled with the voices of climate activists from the past and present, this book is both a call to action and a riveting dramatic history. A Junior Library Guild Selection. **This Dynamic Earth** W. Jacquelyne Kious, Robert I. Tilling, Geological Survey (U.S.), 1996. In the early 1960s the emergence of the theory of plate tectonics started a revolution in the earth sciences. Since then scientists have verified and refined this theory and now have a much better understanding of how our planet has been shaped by plate tectonic processes. We now know that directly or indirectly plate tectonics influences nearly all geologic processes past and present. Indeed the notion that the entire Earth's surface is continually shifting has profoundly changed the way we view our world. **Half-Earth: Our Planet's Fight for Life** Edward O. Wilson, 2016-03-07. An audacious and concrete proposal. Half Earth completes the 86 year old Wilson's valedictory trilogy on the human animal and our place on the planet. J. J. E. Purdy, New Republic. In his most urgent book to date, Pulitzer Prize winning author and world renowned biologist Edward O. Wilson states that in order to stave off the mass extinction of species including our own, we must move swiftly to preserve the biodiversity of our planet. In this visionary blueprint for saving the planet, Stephen Greenblatt, *Half Earth* argues that the situation facing us is too large to be solved piecemeal and proposes a solution commensurate with the magnitude of the problem: dedicate fully half the surface of the Earth to nature. Identifying actual regions of the planet that can still be reclaimed, such as the California redwood forest, the Amazon River basin, and grasslands of the Serengeti among others, Wilson puts aside the prevailing pessimism of our times and speaks with a humane eloquence which calls to us all. Oliver Sacks, *Under Earth, Under Water*. Aleksandra Mizielińska, Daniel Mizieliński, 2016-03. Hundreds of fascinating facts are waiting to be unearthed in this book from Aleksandra and Daniel Mizieliński, the creative duo behind *Maps*. Dive below the surface and find out what happens under the earth and under the water. From early submarines and deep sea life to burrowing animals and man-made tunnels, you will never look at the world in the same way again. *Chapters XI-XII* Emanuel Swedenborg, 1915. *Volcano!* Linda Barr, 2003. Discusses what causes volcanic eruptions, the three main types of volcanoes, early myths about volcanoes, and the environmental impact of eruptions and takes a comprehensive look at the 1980 eruption of Mount St. Helens in Washington State. *Earth Under Fire* Paul A. LaViolette, 2005-10-25. In *Earth Under Fire*, Paul LaViolette investigates the connection between ancient world catastrophe myths and modern scientific evidence of a galactic destruction cycle, demonstrating how past civilizations accurately recorded the causes of these cataclysmic events, knowledge of which may be crucial for the human race to survive the next catastrophic superwave cycle. **The Sun, the Earth, and Near-earth Space** John A. Eddy, 2009. Concise explanations and descriptions, easily read and readily understood, of what we know of the chain of events and processes that connect the Sun to the Earth, with special emphasis on space weather and Sun Climate.
