Mussida,Francesco Pastore,2015-04-29 This book focuses on the questions of how territorial differences in productivity levels and unemployment rates arise in the first place and why territorial differences in labor market performance persist over time Unemployment divergence and unemployment club convergence have been touched on in a large number of works and have recently also been studied using spatial econometric analysis In this book we aim to develop the debate to include several important new topics such as the reasons why structural changes in some sectors cause slumps in some regions but not in others the extent to which agglomeration factors explain regional imbalances the degree of convergence divergence across EU countries and regions the role of labor mobility in reducing increasing regional labor market imbalances the impact of EU and country level regional policy in stimulating convergence and the unsatisfactory role of active labor market policy in stimulating labor supply in the weakest economic areas **The Impact of European Integration on Regional Structural**

**Change and Cohesion** Christiane Krieger-Boden,Edgar Morgenroth,George Petrakos,2008-03-31 Edited by three European editors and spanning across Europe this excellent study focuses on the effects of the European integration process on the inter regional division of labour in both western and Eastern European countries Using extensive empirical analysis of the changes of regional specialization over a period of two decades observing its Agriculture Handbook ,1949 Set includes revised editions of some issues *Politicians, Personal Image and the Construction of Political Identity C.*

Archetti,2014-01-07 Is the media obsession with image leading to a degeneration of politics Are politicians more concerned

with their appearances than with policy substance Through the evidence provided by over 50 interviews with politicians across the UK and Italy local councillors MPs and MEPs this book provides a very different picture of the world of politics than the one we often cynically imagine By relying on extensive excerpts from frank and colorful conversations with the interviewees the analysis develops a new multidisciplinary model to understand the mediatization of politics and the way the personal image of elected representatives is constructed in the age of interconnectedness Bollettino mensile di statistica Istat,1948 The Impact of European Integration on Regional Structural Change and Cohesion , Regional Convergence in the European Union Juan R. Cuadrado-Roura,Marti Parellada,2013-03-14 The introduction of the single currency in the European economic space constitutes without doubt the most visible step towards monetary and economic integration in the EU Those who boosted the birth of the Common Market in 1957 dreamt that this would one day come about as a logical consequence of the integration process However things have gone much more slowly than possibly imagined although if taken in an adequate historic perspective it is undeniable that the agreements that have led to European Monetary Union signify a really formidable jump in the process of political and economic integration in Europe This is something many doubted would ever happen but which is already a reality although still in need of a period of consolidation The most general economic consequences of the EMU have already been analysed in considerable depth Proof of this is the literature already available In general there is coincidence in affirming that the balance of the results expected is clearly positive Firstly as a result of the anticipated gains in efficiency a consequence of reduction of transaction costs associated to the previous existence of different currencies and of the elimination of exchange rate uncertainties Financial Structure and Stability Alexander Karmann,2000-10-26 The basic question of this book is what we can learn from empirical as well as theoretical analysis of financial systems differing cross sectional and changing structurally over time with respect to the issue of stability of financial systems Part I of the book deals with stability issues in a globalizing financial world and addresses topics of convergence domestic policy financial bubbles crises and international coordination Part II is on banking systems Country specific adoption and restructuring of universal but also separation banking systems are key problems for the industrialized economies while catching up is of major concern for the economies in transition Feeble regional economies and subsidized banking is at the heart of the vivid dispute on public sector banking being taken up in Part III The last Part is devoted to resource oriented approaches in quantifying financial development and risk of sovereign default **Italian Regionalism: Between Unitary Traditions and Federal Processes** Stelio Mangiameli,2014-06-12 The object of this book is to describe the institutional modifications of the Italian form of state more than ten years after the review of Title V Part II of the Italian Constitution for an audience that goes well beyond the Italian national boundaries The fifteen essays that make up the book discuss the birth and evolution of the Italian regionalism including those regions with Special Statutes as well as reforms of 1999 2001 A particular attention is devoted to the role of autonomy in defining regional statutes regional forms of

government and regulatory and administrative powers These are subjects on which there is by now an abundant body of constitutional case law which is extensively referred to by the chapters The role of the regions vis vis the local bodies and vis vis the European and international order is also discussed as the right to negotiate with foreign powers has now been conferred on the regions Lastly the volume presents contributions on regional finance and on the new law on fiscal federalism as well as on regional powers in the area of health and welfare
