2012 ,2013-03-01 Particularly in the humanities and social sciences festschrifts are a popular forum for discussion The IJBF provides quick and easy general access to these important resources for scholars and students The festschrifts are located in state and regional libraries and their bibliographic details are recorded Since 1983 more than 659 000 articles from more than 30 500 festschrifts published between 1977 and 2011 have been catalogued **La Construction moderne** ,1928 *Pamphlets on Biology* ,1870 **Bulletin** Société des sciences, lettres & arts de Bayonne,1912 *Louis XIV's Architect* Richard Ballard,2023-12-30 A must read for those seeking to understand the intersection of politics and art in a pivotal moment of European history This is a study of royal absolutism in a most extreme form in modern European history and of the nature of Louis XIV s concept of personal glory and of the embodiment of France as a new superpower It is a study of political ideas expressed in architecture to establish Versailles as the centre of French world power and royal prestige It is also a personal story full of social cultural and economic history of the period as seen in the life and work of Louis Le Vau from a humble family of craftsmen who was a self taught architect in the early history of the profession skilled in technical craft skills and even grand design He was a major contributor to the architectural glories of Paris including the Louvre Vincennes Versailles and the College of the Four Nations And all achieved despite interference from the great magnates of the age like Mazarin and Colbert and constant mind changing by the King who wanted every feature in the buildings to reflect his concept of personal royal prestige Le Vau was Louis XIV s First Architect from 1654 until his death and disgrace in 1670 The social cultural economic and political backdrop is striking with court intrigue scandal corruption luxury indulgence and the rise of a rich bourgeoisie but the main thrust of the story concerns Louis XIV and the royal personal ambition and the

work of a stone cutter's son who became the Sun King's instrument. The study is good on the more technical features of architectural history reminiscent of Pevsner's marvellous Buildings of England series

A Portrait of Canada's Parliament William McElligott, 2020-05-04 A stunning visual exploration of Canada's most recognized building accompanied by a comprehensive study of its history in a coffee table worthy volume. The Centre Block, the iconic parliament building that has come to be Canada's foremost representation, was closed in 2018 and will remain closed for at least a decade for a complete renovation and restoration. During that time, hundreds of thousands of Canadians and visitors to Canada will miss the opportunity to tour the building and view its architecture and symbolic artwork. With original photographs from noted architectural photographer William P. McElligott, historical images and thematic articles written by established subject specialists, *A Portrait of Canada's Parliament* provides a contemporary look at one of the nation's greatest symbols and documents and analyzes the context, landscape, heritage and structure of this unique national icon from its origins to its present and to its future ahead. This gorgeous volume, presented in English and French, will be treasured by all those with an interest in Canada's architectural and parliamentary history.

La Reconstruction en Europe Après la Première Et la Seconde Guerre Mondiale Et Le Rôle de la Conservation Des Monuments Historiques Nicholas Bullock, Luc Verpoest, 2011 *Living with History* focuses on a particular aspect of heritage preservation in the twentieth century: destruction and postwar reconstruction in Belgium, France, Germany, Great Britain and The Netherlands. This book establishes a status quaestionis for the historiography of wartime and postwar preservation and sets these particular developments in preservation history in the context of the general evolution of architecture and urbanism. The authors investigate the specific role of conservationists and heritage institutions and administrations in the overall reconstruction and examine the part played by architects and planners in heritage preservation.
