*Pierres et hommes* Jean Kerisel, 2005 La pierre esclave des rêves de l'homme au début tout est harmonie intelligence mutuelle mais une trop grande témérité conduit la catastrophe De Ch ops Soufflot en passant par les bâtisseurs de campaniles ou de cathédrales l'auteur remonte les siècles pour en donner les exemples *Of Stones and Man* Jean Kerisel, 2022-09-16 *Of Stones and Man* explores the many errors of judgement made by civilizations both ancient and modern across the world Arrogance and a penchant for excess drove mankind to build ever greater and more ambitious edifices The author analyzes these works from a scientific and historically sensitive perspective highlighting the hydro geological background to repeated infamous disasters from the faults inherent in the Sphinx to the leaning Tower of Pisa Beautifully illustrated throughout *Of Stones and Man* is a testament to the impermanence of our surroundings It questions how the earth and its resources have borne the cumulative burden placed upon it over the ages by one civilization after another and how in turn the earth has exacted its inevitable revenge on the great constructions of our ancestors *Of Stones and Man* is the final work of Jean Kerisel 1908 2005 who served as President of the International Society for Soil Mechanics and Foundation Engineering from 1973 to 1977 and who worked worldwide as a consultant on many ambitious engineering projects Driven by his great passion for Ancient Builders and Egyptology Kerisel here extends his professional knowledge into the realms of historical architecture

**Stone** Jeffrey Jerome Cohen, 2015-05-06 *Stone* maps the force vivacity and stories within our most mundane matter stone For too long stone has served as an unexamined metaphor for the really real blunt factuality nature's curt rebuke Yet medieval writers knew that stones drop with fire from the sky emerge through the subterranean lovemaking of the elements tumble along riverbeds from Eden partner with the masons who build worlds with them Such motion suggests an ecological enmeshment and an almost creaturely mineral life Although geological time can leave us reeling Jeffrey Jerome Cohen argues that stone's endurance is also an invitation to apprehend the world in other than human terms Never truly inert stone poses a profound challenge to modernity's disenchantments Its agency undermines the human desire to be separate from the environment a bifurcation that renders nature out there a mere resource for recreation consumption and exploitation Written with great verve and elegance this pioneering work is notable not only for interweaving the medieval and the modern but also as a major contribution to ecotheory Comprising chapters organized by concept Geophilia Time Force and Soul Cohen seamlessly brings together a wide range of topics including stone's potential to transport humans into nonanthropocentric scales of place and time the petrification of certain cultures the messages fossils bear the architecture of Bordeaux and Montparnasse Yucca Mountain and nuclear waste disposal the ability of stone to communicate across millennia in structures like Stonehenge and debates over whether stones reproduce and have souls Showing that what is often assumed to be the most lifeless of substances is in its own time restless and forever in motion *Stone* fittingly concludes by taking us to Iceland a land that writes the author reminds us that stone like water is alive that stone like water is transient *Conservation and*

*Restoration of Built Heritage* Salvatore D'Agostino, 2021-08-16 The word conservation when used in the context of the preservation of built heritage implies an intrinsically complex concept that evolved over time since it has been influenced by the perception of history throughout time This volume emphasises why an understanding of the cultural evolution of the conservation approach must be considered a prerequisite for architects and engineers if they are to cooperate in full harmony with historic artistic culture for the preservation of global built heritage In particular the volume highlights how during the second half of the last century the preservation process also involved engineering the science of making practical applications of knowledge which for a long time made an uncritical use of techniques and materials and devised interventions on historical heritage that were heavily invasive The volume also devotes special attention to the problems related to seismic risk to which Italy Greece and Portugal are particularly prone Problems that emerge during the crisis and reconstruction phases are dealt with in detail as is scheduled maintenance as this latter approach always constitutes an improvement in the performance of the monument and is the most appropriate tool for the conservation of the built heritage Finally the volume collects examples of building restoration with case studies of many outstanding monuments The work will appeal to professionals and academics in the broader fields of civil engineering both geotechnical and structural engineering architecture art history the history of architecture restoration and cultural heritage management This book will Provide a critical reading of the history of conservation Discuss materials and techniques of ancient architecture Cover seismic vulnerability and preservation of the historic integrity of the monument Advocate an approach based on programmed maintenance Feature numerous case histories including St Mark s Basilica in Venice and the complex restoration of the cathedral of Notre Dame in Paris Géotechnique ,2005 **L'Age de la pierre et l'homme primitif** Pierre Julien Hamard,1883 Oeuvres complètes de Jacques-Henri-Bernardin de Saint-Pierre Bernardin de Saint-Pierre,1833
