Meditations on First Philosophy René Descartes, 2024-05-09 Descartes interpretation of being and truth first creates the precondition for the possibility of a theory of knowledge or metaphysics of knowledge Only through Descartes realism is enabled to prove the reality of the external world and to save that which exists in itself Heidegger The Time of the World Image A modern translation of Descartes famous work Meditations on First Philosophy This edition contains a timeline of Descartes life and works a glossary of Cartesian terminology and Afterword by the translator that explains the significance of Descartes contributions to modern philosophy and science particularly his method of skepticism and rationalism This scholarly apparatus nests this work into Descartes larger body of work and the place of his philosophy into the broader history of western ideology Descartes focus on clear logical reasoning is a hallmark of his philosophy and his influence on fields such as mathematics and physics is profound with his work laying the foundation for later scientific advances Ren Descartes Meditations on First Philosophy 1641 is one of the most influential works in Western philosophy In this text Descartes seeks to establish a foundation for knowledge that is free from doubt beginning with the method of radical skepticism His goal is to discover what can be known with absolute certainty The Meditations consist of six parts each building on the previous one and they explore questions of existence knowledge and the nature of reality Moreover the Meditations addressed fundamental questions about the nature of existence the mind body problem and the existence of God many of which continue to be relevant in philosophical debates today Descartes work marked a shift away from reliance on tradition and authority towards an emphasis on individual reasoning critical inquiry and the scientific method In the first meditation Descartes applies radical doubt questioning the reliability of sensory experience mathematical truths and even the existence of the physical world leaving open the possibility of a powerful deceiver the evil demon In the second meditation he arrives at the indubitable truth that while everything else can be doubted the fact that he is thinking cannot leading to his famous conclusion Cogito ergo sum I think therefore I am He then distinguishes the mind as a thinking non material substance from the body an extended material one introducing the mind body dualism In the third meditation Descartes formulates his argument for the existence of God positing that the idea of a perfect infinite being must have originated from such a being God since he a finite and imperfect being could not have conceived it on his own The fourth meditation explores why humans make errors attributing it to the misuse of free will where judgments are made without sufficient understanding rather than any flaw in God In the fifth meditation Descartes presents another argument for God s existence the ontological argument asserting that the very idea of a perfect being necessarily includes existence Finally in the sixth meditation he concludes that the external world exists affirming the reality of material objects and the body since a non deceptive God would not allow his clear and distinct perceptions to be false although sensory experience can still be occasionally misleading This systematic method of doubt and reasoning establishes a secure foundation for scientific and

From Rousseau to Lenin Lucio Colletti, 2017-11-10 This is the first of Lucio Colletti's books to be translated into English in which he considers the scientific character of Marxism In contrast to the preoccupation with Hegel and his contribution to the formation of Marx's thought Colletti goes back on the one hand to the founders of political economy and on the other to Rousseau In Rousseau's critique of civil society Colletti isolates a crucial watershed in the development of a counter theory to modern bourgeois society The second of Colletti's central concerns is with the unity of Marxism For him it is an integral science of history and of society which denies the pretensions of bourgeois sociology to any scientific status His attack is concentrated on Max Weber and his epigone Karl Mannheim but has wider implications for sociology in general This is followed by a devastating critique of Bernstein's evolutionist revision of Marx From Rousseau to Lenin also contains a polemical study of Marcuse's neo romantic utopianism and the masterly statements of the contemporary relevance of Lenin's State and Revolution and Marx's Capital to the struggle for the overthrow of capitalism
