Pillar And The Ground Of Truth:

The Pillar and Ground of the Truth Pavel Florensky, 2018-06-05 Pavel Florensky certainly the greatest Russian theologian of the last century is now recognized as one of Russia's greatest polymaths. Known as the Russian Leonardo da Vinci, he became a Russian Orthodox priest in 1911 while remaining deeply involved with the cultural, artistic, and scientific developments of his time. Arrested briefly by the Soviets in 1928, he returned to his scholarly activities until 1933 when he was sentenced to ten years of corrective labor in Siberia. There he continued his scientific work and ministered to his fellow prisoners until his death four years later. This volume is the first English translation of his rich and fascinating defense of Russian Orthodox theology. Originally published in 1914, the book is a series of twelve letters to a brother or friend who may be understood symbolically as Christ. Central to Florensky's work is an exploration of the various meanings of Christian love, which is viewed as a combination of *philia* (friendship) and *agape* (universal love). Florensky is perhaps the first modern writer to explore the so-called same-sex unions, which for him are not sexual in nature. He describes the ancient Christian rites of the *adelphopoiesis* (brother-making), joining male friends in chaste bonds of love. In addition, Florensky is one of the first thinkers in the twentieth century to develop the idea of the Divine Sophia, who has become one of the central concerns of feminist theologians.
