**Pillsbury's Best** William J. Powell,1985      **Food and Drink in American History** Andrew F. Smith,2013-10-28 This three volume encyclopedia on the history of American food and beverages serves as an ideal companion resource for social studies and American history courses covering topics ranging from early American Indian foods to mandatory nutrition information at fast food restaurants The expression you are what you eat certainly applies to Americans not just in terms of our physical health but also in the myriad ways that our taste preferences eating habits and food culture are intrinsically tied to our society and history This standout reference work comprises two volumes containing more than 600 alphabetically arranged historical entries on American foods and beverages as well as dozens of historical recipes for traditional American foods and a third volume of more than 120 primary source documents Never before has there been a reference work that coalesces this diverse range of information into a single set The entries in this set provide information that will transform any American history research project into an engaging learning experience Examples include explanations of how tuna fish became a staple food product for Americans how the canning industry emerged from the Civil War the difference between Americans and people of other countries in terms of what percentage of their income is spent on food and beverages and how taxation on beverages like tea rum and whisky set off important political rebellions in U S history      **International**

constructing culture consumer behavior and national identity      The Hundred-Year Marathon Michael Pillsbury,2015-02-03

One of the U S government s leading China experts reveals the hidden strategy fueling that country s rise and how Americans have been seduced into helping China overtake us as the world s leading superpower For more than forty years the United States has played an indispensable role helping the Chinese government build a booming economy develop its scientific and military capabilities and take its place on the world stage in the belief that China s rise will bring us cooperation diplomacy and free trade But what if the China Dream is to replace us just as America replaced the British

Empire without firing a shot Based on interviews with Chinese defectors and newly declassified previously undisclosed national security documents The Hundred Year Marathon reveals China's secret strategy to supplant the United States as the world's dominant power and to do so by 2049 the one hundredth anniversary of the founding of the People's Republic Michael Pillsbury a fluent Mandarin speaker who has served in senior national security positions in the U.S. government since the days of Richard Nixon and Henry Kissinger draws on his decades of contact with the hawks in China's military and intelligence agencies and translates their documents speeches and books to show how the teachings of traditional Chinese statecraft underpin their actions He offers an inside look at how the Chinese really view America and its leaders as barbarians who will be the architects of their own demise Pillsbury also explains how the U.S. government has helped sometimes unwittingly and sometimes deliberately to make this China Dream come true and he calls for the United States to implement a new more competitive strategy toward China as it really is and not as we might wish it to be The Hundred Year Marathon is a wake up call as we face the greatest national security challenge of the twenty first century      **Headquarters Economy** J. Myles Shaver, 2018 By investigating the headquarters economy of Minneapolis St Paul and exploring the management strategies of headquarters this book surveys the characteristics of influential dynamic economies demonstrating how factors such as managers mobility and migration create a virtuous cycle that strengthens companies and draws in additional talent      **Historical Dictionary of the Gilded Age** Leonard C. Schlup, James Gilbert Ryan, 2003 Covers all the people events movements subjects court cases inventions and more that defined the Gilded Age      The Decisive Network Nadya Bair, 2020 Since its founding in 1947 the legendary Magnum Photos agency has been telling its own story Its photographers were concerned witnesses to history and artists on the hunt for decisive moments their pictures were humanist documents of the postwar world Based in unprecedented archival research The Decisive Network peels back layers of the Magnum mythology to offer a new history of what it meant to shoot edit and sell news images after World War II Between the 1940s and 1960s Magnum expanded the human interest story about the everyday life of ordinary people to global dimensions while bringing the aesthetic of news pictures into new markets Its best known work started as humanitarian aid promotion travel campaigns corporate publicity and advertising Working with this range of clients Magnum made photojournalism integral to visual culture Yet Magnum's photographers could not have done this alone This book unpacks the collaborative nature of photojournalism as it transpired on a daily basis focusing on how picture editors sales agents spouses and publishers helped Magnum photographers succeed in their assignments and achieve fame The Decisive Network concludes in the late 1960s and early 1970s when amidst the decline of magazine publishing and the rise of an art market for photography Magnum turned to photo books and exhibitions to manage its growing picture archives and consolidate its brand In that moment Magnum's photojournalists became artists and their assignments turned into oeuvres Such ideas were necessary publicity and they also managed to shape discussions about photography for decades Bridging art

history media studies cultural history and the history of communication this book transforms our understanding of the photographic profession and the global circulation of images in the pre digital world      **The Greater Plains** Brian Frehner, Kathleen A. Brosnan, 2021-07 The Greater Plains tells a new story of a region stretching from the state of Texas to the province of Alberta where the environments are as varied as the myriad ways people have inhabited them These innovative essays document a complicated history of human interactions with a sometimes plentiful and sometimes foreboding landscape from the Native Americans who first shaped the prairies with fire to twentieth century oil regimes whose pipelines linked the region to the world The Greater Plains moves beyond the narrative of ecological desperation that too often defines the region in scholarly works and in popular imagination Using the lenses of grasses animals water and energy the contributors reveal tales of human adaptation through technologies ranging from the travois to bookkeeping systems and hybrid wheat Transnational in its focus and interdisciplinary in its scholarship The Greater Plains brings together leading historians geographers anthropologists and archaeologists to chronicle a past rich with paradoxical successes and failures conflicts and cooperation but also continual adaptation to the challenging and ever shifting environmental conditions of the North American heartland      **Enterprising Minnesotans** Stephen George, Stories of the creative bold and diverse men and women throughout Minnesota s history who have built exceptional businesses Here are portrayals of people driven by an entrepreneurial spirit to found enterprises from 1849 to the present      **Minnesota History** Theodore Christian Blegen, Bertha Lion Heilbron, 2008 Vol 6 includes the 23d Biennial report of the Society 1923 24 as an extra number      *Fast Food and Junk Food* Andrew F. Smith, 2011-12-02 This fascinating and revealing work examines the incredible power of junk food and fast food how nostalgic we are about them the influence of the companies that manufacture or sell them and their alarming effect on our country s state of health In the last half century junk food and fast food have come to play an extremely important role in American economic historical cultural and social life Today they have a major influence on what Americans eat and how healthy we are or aren t *Fast Food and Junk Food An Encyclopedia of What We Love to Eat* tells the intriguing fun and incredible stories behind the successes of these commercial food products and documents the numerous health related environmental cultural and politico economic issues associated with them With more than 700 alphabetically arranged entries this two volume encyclopedia contains enough listings to allow readers to research a wide range of fascinating topics The author treats the massive amount of subject material within this reference title in a fair and balanced manner A secondary focus of this encyclopedia is to chart the spread of some American fast food chains and commercially produced junk foods internationally      **Creating Consumers** Carolyn M. Goldstein, 2012-05-28 Home economics emerged at the turn of the twentieth century as a movement to train women to be more efficient household managers At the same moment American families began to consume many more goods and services than they produced To guide women in this transition professional home economists had two major goals to teach women to assume their new roles

as modern consumers and to communicate homemakers needs to manufacturers and political leaders Carolyn M Goldstein charts the development of the profession from its origins as an educational movement to its identity as a source of consumer expertise in the interwar period to its virtual disappearance by the 1970s Working for both business and government home economists walked a fine line between educating and representing consumers while they shaped cultural expectations about consumer goods as well as the goods themselves Goldstein looks beyond 1970s feminist scholarship that dismissed home economics for its emphasis on domesticity to reveal the movement s complexities including the extent of its public impact and debates about home economists relationship to the commercial marketplace Out Where the West Begins Philip F.

Anschutz,William J. Convery,Thomas J. Noel,2017-12-15 Between 1800 and 1920 an extraordinary cast of bold innovators and entrepreneurs individuals such as Cyrus McCormick Brigham Young Henry Wells and James Fargo Fred Harvey Levi Strauss Adolph Coors J P Morgan and Buffalo Bill Cody helped lay the groundwork for what we now call the American West They were people of imagination and courage adept at maneuvering the rapids of change alert to opportunity persistent in their missions They had big ideas they were not afraid to test They stitched the country together with the first transcontinental railroad invented the Model A and built the roads it traveled on raised cities and supplied them with water and electricity established banks for immigrant populations entertained the world with film and showmanship and created a new form of western hospitality for early travelers Not all were ideal role models Most however once they had made their fortunes shared them in the form of cultural institutions charities libraries parks and other amenities that continue to enrich lives in the West today Out Where the West Begins profiles some fifty of these individuals tracing the arcs of their lives exploring their backgrounds and motivations identifying their contributions and analyzing the strategies they developed to succeed in their chosen fields **The Life and Death of Buffalo's Great Northern Grain Elevator** Bruce Jackson,2024-04-01 Archer

Daniels Midland got lucky the night of December 11 2021 a fierce winter wind took out a third of the brick wall of Buffalo s Great Northern Grain Elevator ADM had wanted to demolish the building since 1993 but each of its demolition requests to the city had been blocked Six days after the storm with no public hearings the building was condemned A unique piece of Buffalo s economic and global architectural history was gone Grain elevators are part of Buffalo s and the nation s architectural heritage Unlike earlier wooden structures the Great Northern was made of steel it was fireproof The steel bins kept the grain dry and the rats out The entire steel structure was riveted and bolted into a single entity The Great Northern couldn t burn down or blow up it couldn t be knocked down and it was incapable of falling down When the Great Northern was completed seven months after the shovels broke ground it was the largest grain elevator in the world It was built to last and last it did until the eight month task of tearing it apart began on September 16 2022 Photographer and activist Bruce Jackson documents the story of this key architectural landmark through text documents and his own photographs taken over a period of several decades to tell this tragic story that will appeal to anyone interested in the history and preservation of

America's industrial culture      **History of Minneapolis** Marion Daniel Shutter, 1923      **1950s Television Advertising** Vincent Terrace, 2025-01-02 Winston tastes good like a cigarette should and You'll wonder where the yellow went when you brush your teeth with Pepsodent are only two of the many slogans associated with advertising on television in the 1950s. There were celebrities like Marilyn Monroe, Barbara Eden, and Peter Lorre who performed in commercials; there were shows built around a single product, e.g., The Texaco Star Theater and The Colgate Comedy Hour; there were numerous premiums offered to children, e.g., The Sky King Detecto Microscope, The Mickey Mouse Club Magazine, and gimmicks used by sponsors to attract viewers to their shows, e.g., Win a Wagon Train Pony and The Howdy Doody Smile Contest. This is the first and only book of its kind; it is a nostalgic trivia-filled history presented through the actual programs and commercials of the 1950s. In addition to two extensively detailed sections which have never been released online or in any other book, Sponsor and Program and Program and Sponsor, rare television theme songs with their original sponsor tags, products mentioned in the theme songs are also presented. It all began on July 1, 1941, when WNBT, the NBC affiliate in New York City, televised the first commercial, a ten-second spot for Bulova Watches.

Societal Impact of Spaceflight Steven J. Dick, Roger D. Launius, 2007 Since the dawn of spaceflight, advocates of a robust space effort have argued that human activity beyond Earth makes a significant difference in everyday life. Assertions abound about the impact of spaceflight on society and its relationship to the larger contours of human existence. Fifty years after the Space Age began, it is time to examine the effects of spaceflight on society in a historically rigorous way. Has the Space Age indeed had a significant effect on society? If so, what are those influences? What do we mean by an impact on society? And what parts of society? Conversely, has society had any effect on spaceflight? What would be different had there been no Space Age? The purpose of this volume is to examine these and related questions through scholarly research, making use especially of the tools of the historian and the broader social sciences and humanities. Herein, a stellar array of scholars does just that and arrives at sometimes surprising conclusions.
