A. Redford, P. F. Cotsworth, 1974 Guidebook on Design, Construction and Operation of Pilot Plants for Uranium Ore Processing International Atomic Energy Agency, 1990 The design construction and operation of a pilot plant are often important stages in the development of a project for the production of uranium concentrates. The main purpose of this guidebook is to discuss the objectives of a pilot plant and its proper role in the overall project Since building and operating a pilot plant is very costly it is important that such a plant be built only after several prerequisites have been met This book discusses the rationale for a pilot plant and provides guidelines with suggested solutions for a variety of problems that may be encountered Practical Design, Construction and Operation of Food Facilities J.
