Left of Boom Douglas Laux, Ralph Pezzullo, 2016-04-05 *Left of Boom* is the explosive New York Times bestselling memoir by a young CIA operative on the front lines in Afghanistan. On September 11, 2001, Douglas Laux was a freshman in college on the path to becoming a doctor. But with the fall of the Twin Towers came a turning point in his life. After graduating, he joined the Central Intelligence Agency, determined to get himself to Afghanistan and into the center of the action. Through persistence and hard work, he was fast tracked to a clandestine operations position overseas. Dropped into a remote region of Afghanistan, he received his baptism by fire. Frustrated by bureaucratic red tape, a widespread lack of knowledge of the local customs and culture, and an attitude of complacency that hindered his ability to combat the local Taliban, Doug confounded his peers by dressing like a native and mastering the local dialect, making contact and building sources within several deadly terrorist networks. His new approach resulted in unprecedented successes, including uncovering the largest IED network in the world responsible for killing hundreds of US soldiers. Meanwhile, Doug had to keep up false pretenses with his family, girlfriend, and friends; nobody could know what he did for a living and deal with the emotional turbulence of constantly living a lie. His double life was building to an explosive resolution with repercussions that would have far-reaching consequences.

Royal Navy Way of Leadership Andrew St George, 2012-06-07 Four years ago, the Second Sea Lord of the Royal Navy asked Andrew St George to spend time with every level of the Navy staff, from junior sailors in the engine room of an aircraft carrier to handlers of landing craft, through to Royal Marines ship commanders and Royal Navy staff right up to Navy Board and Cabinet level, with the aim of creating a book which distils the leadership culture of perhaps the most highly respected and efficient organization in the world. This book charts that journey, representing the largest piece of research on Royal Navy leadership ever done, and it is the current state-of-the-art leadership framework for the Navy. St George writes about how to plan and execute, how to exercise judgment, and how to motivate people. Everything in the book is here because it works, tested over thousands of hours of hard training, rigorous assessment, and absolute measurement. The book's messages are deceptively simple. In order to succeed, we must have the clarity of intent, the strategy, the resources, a contingency plan, an emotional investment. These tenets stand in all walks of business and personal life. The Royal Navy's way of getting things done depends on soft skills, high emotional intelligence, and an understanding of how people work in small teams. This book, 15,000 copies will be issued to every Royal Navy officer and Senior Rate, middle manager in the Service. The book's insights are profound, and their applications are wide-ranging, for industry, for finance, for

Operations Thomas P Odom,Frederick M. Franks,Combat Studies Institute,2010-12-01 In August 1964 thousands of Simba rebels attacked and captured the city of Stanleyville in the newly independent Republic of the Congo and took more than 1 600 European and American residents as hostages threatening to kill them if any attempt was made to recapture the city In November of that year after months of increasingly tense and complex discussions among the governments whose nationals were being held an airborne assault by Belgian paracommandos dropped by American Air Force planes combined with a CIA piloted air strike against the Stanleyville airport liberated most of the hostages but only after a Simba initiated massacre *Dragon Operations Hostage Rescues in the Congo 1964 1965* provides both the political background to these events and a detailed account of the actual operations *Dragon Rouge* the operations in Stanleyville and *Dragon Noir* focused on the city of Paulis several hundred miles away The book highlights the difficulties in organizing an international rescue effort with insufficient joint planning and inadequate command and control among the Belgian and American forces as well as their

differing political ideas and goals The ad hoc nature of the planning was exemplified by an initial American Special Forces plan to air drop its forces east of Stanleyville and float down the river to Stanleyville This plan was aborted when it was pointed out that the existence of Stanley Falls between the drop zone and the city was an insuperable obstacle The operation also suffered from the Belgian commander's colonial era contempt for the numerical strength of the Simbas and American fears of what was in reality a non-existent Communist element in the rebel movement Dragon Operations demonstrates that despite the slapdash nature of their planning and communications aspects as well as the distance involved the austere support the large number of hostages and a lack of intelligence data they were remarkably successful in rescuing most of the hostages Although less than ideal the operations worked better than expected given the conditions under which they were conducted This important study of an almost forgotten episode of the Cold War has much to offer to military strategists and tacticians political scientists and students of contemporary history alike Originally published in 1988 236 p maps ill *After Mountains and Sea* Helen Frankenthaler, 2003-07-02 Essays by Susan Cross and Julia Brown
