Henderson, 2016-10-06 This book provides comprehensive coverage of Lithium Li metal anodes for rechargeable batteries Li is an ideal anode material for rechargeable batteries due to its extremely high theoretical specific capacity 3860 mAh g⁻¹ low density 0.59 g cm⁻³ and the lowest negative electrochemical potential 3.040 V vs standard hydrogen electrodes Unfortunately uncontrollable dendritic Li growth and limited Coulombic efficiency during Li deposition stripping inherent in these batteries have prevented their practical applications over the past 40 years With the emergence of post Li-ion batteries safe and efficient operation of Li metal anodes has become an enabling technology which may determine the fate of several promising candidates for the next generation energy storage systems including rechargeable Li-air batteries Li-S batteries and Li-metal batteries which utilize intercalation compounds as cathodes In this work various factors that affect the morphology and Coulombic efficiency of Li anodes are analyzed The authors also present

the technologies utilized to characterize the morphology of Li deposition and the results obtained by modeling of Li dendrite growth Finally recent developments especially the new approaches that enable safe and efficient operation of Li metal anodes at high current densities are reviewed The urgent need and perspectives in this field are also discussed The fundamental understanding and approaches presented in this work will be critical for the application of Li metal anodes The general principles and approaches can also be used in other metal electrodes and general electrochemical deposition of metal films

Diffusion of Technologies and Social Behavior Nebojsa Nakicenovic,Arnulf Grübler,2013-03-14 We felt it before in sense but now we know it by science Edward Misselden 1623 The collective effort reported in this volume is the outcome of the diffusion of the idea of diffusion as a fundamental process in society The considerable number of disciplines represented here indicates the weight of the problem area The editors are to be congratulated for their initiative in drawing together present thinking at a vivid meeting now also in print An old timer in the business has not much to add But maybe some things bearing in mind that a Preface is a celebration and not a review As always with ideas it is hard to identify those who first gave shape to the idea of diffusion In a general sense it is probably an observation as old as human self reflection that groups of populations exchange ideas and copy habits and implements from each other Sometimes it has even been recommended as a Chinese proverb suggested millenia ago If you want to become a good farmer look at your neighbor
